APPENDIX 9	Summary of FRAs and PFAs that have not Closed, as of December 31, 2012
APPENDIX 10	800 MHz Transition Administrator, LLC Fees and Expenses through December 31, 2012

OVERVIEW

The 800 MHz Transition Administrator, LLC (“TA”) provides its Quarterly Progress Report to the Federal Communications Commission (“FCC”) regarding the progress of the reconfiguration of the 800 MHz band for the quarter ended December 31, 2012. Pursuant to the FCC’s *Reconfiguration Orders*,¹ the TA, as the manager of the reconfiguration effort, is required to report on a quarterly basis the progress of band reconfiguration.²

The band reconfiguration program in non-border areas has consisted of two stages of activity: the clearing of 806-809 MHz/851-854 MHz (Channels 1-120)³ in Stage 1 and the relocation of Public Safety’s NPSPAC channel users to this vacated spectrum in Stage 2. There are two phases of reconfiguration for each of these stages – the planning and negotiation phase that results in a Frequency Reconfiguration Agreement (“FRA”) between the licensee and Sprint Nextel and the implementation phase that consists of the physical retuning of the radio system.

Reconfiguration Progress Overview

Chart 1 shows the percentage of FRAs that have been approved by the TA, the percentage of physical retunes that are complete, and the percentage of FRAs for which closing is complete for each stage of the reconfiguration program as of December 31, 2012.

Chart 1: Status of Negotiations, Physical Retuning, and Closing

¹ Improving Public Safety Communications in the 800 MHz Band, *Report and Order, Fifth Report and Order, Fourth Memorandum Opinion and Order, and Order*, 19 FCC Rcd 14969 (2004) (“*Report and Order*”); *Supplemental Order and Order on Reconsideration*, 19 FCC Rcd 25120 (2004) (“*Supplemental Order*”); *Second Report and Order*, 23 FCC Rcd 7605 (2008); *Third Report and Order and Third Further Notice of Proposed Rulemaking*, 25 FCC Rcd 4443 (2010) (“*Third Report and Order*”); *Fourth Report and Order*, 26 FCC Rcd 1937 (2011) (collectively “*Reconfiguration Orders*”).

² See 47 C.F.R. § 90.676(b)(3).

³ The references herein to Channels 1-120 should be understood to reflect the pre-rebanding channel designations of the 806-809 MHz/851-854 MHz band segment. Post-rebanding, this band segment is the NPSPAC band designated as Channels 1-230.

Nearly all licensees in the program, except for those in the Mexico border region, have completed FRA negotiations. Physical retuning was complete for 90 percent of FRAs, except for those in the Mexico border region, as of December 31, 2012. There continues to be a gap between licensees completing physical retuning and completing their closing activities, especially for non-border Stage 2 licensees.

Non-border Stage 2 (NPSPAC and Expansion Band) licensees retuned, reflashed, or replaced approximately 30,000 radios (first touches) in the fourth quarter, raising the total number to approximately 1,472,000 radios as of December 31, 2012. Physical retuning was complete for 86 percent of non-border Stage 2 FRAs as of December 31, 2012.

Canadian border licensees primarily are engaged in implementation activities. Physical retuning was complete for 92 percent of Canadian border Stage 1 (non-Public Safety) FRAs as of December 31, 2012. Canadian border Stage 2 (NPSPAC and non-NPSPAC Public Safety) licensees retuned, reflashed, or replaced approximately 27,000 radios (first touches) in the fourth quarter, raising the total number to approximately 112,000 radios as of December 31, 2012. Physical retuning was complete for 46 percent of Canadian border Stage 2 FRAs as of December 31, 2012.

The TA conducted an Implementation Planning Session (“IPS”) in NPSPAC Region 43: Washington on January 31, 2013 and an IPS in NPSPAC Region 21: Michigan on March 6, 2013. At the sessions, the TA worked with licensees, vendors, and Sprint Nextel to develop a consolidated implementation schedule for each region that identifies key milestones and dependencies associated with reconfiguration implementation activities.

Reconfiguration of Mexican Border Licensees

On August 17, 2012, the FCC’s Public Safety and Homeland Security Bureau (“PSHSB”) released a Fourth Further Notice of Proposed Rulemaking (“*Fourth FNPRM*”) seeking comment on proposals for establishing and implementing the reconfigured 800 MHz band plan along the U.S.-Mexico border.⁴ Comments and reply comments on the *Fourth FNPRM* were filed during the fourth quarter of 2012. The release of the Report and Order will trigger the start of required reconfiguration activities.

Mexican border licensees should take action to prepare and plan for reconfiguration. Frequencies at locations further away from the U.S.-Mexico border outside the Sharing Zone, such as the Los Angeles and Phoenix areas that will not be affected by Mexican locations that need to clear frequencies, can expect to be the first to reconfigure. Licensees in these areas especially should be starting to prepare and plan. The FCC has encouraged Mexican border licensees to engage in planning and negotiation activities to the extent that they are not

⁴ See Improving Public Safety Communications in the 800 MHz Band; New 800 MHz Band Plan for U.S. – Mexico Sharing Zone, *Fourth Further Notice of Proposed Rulemaking*, 27 FCC Rcd 9563 (2012) (“*Fourth FNPRM*”).

frequency-dependent and would not result in unnecessary duplication of costs.⁵ The TA encourages large licensees in particular to get an early start on their planning activities. Licensees should submit a Point of Contact Form to the TA, review and update their license information in the FCC's Universal Licensing System ("ULS") database, and identify and contact vendors and consultants to assist with reconfiguration. Licensees may conduct the following non-frequency-dependent activities: conducting subscriber unit inventory, conducting infrastructure inventory, engaging in non-frequency-specific engineering and implementation planning, and defining their interoperability environment. If a licensee requires funding to conduct planning activities, it should submit a Request for Planning Funding ("RFPF") and negotiate a PFA with Sprint Nextel. Licensees may submit an RFPF prior to receiving replacement frequencies.

The TA encourages licensees to review information on the TA's website (<http://www.800TA.org>) regarding the reconfiguration process, such as the Reconfiguration Handbook, and familiarize themselves with the steps of reconfiguration and the TA's policies and procedures. Licensees should promptly respond to TA communications and requests for information from the TA. The TA plans to hold outreach meetings with licensees after the FCC releases a Report and Order establishing the final band plan.

Completion of Band Reconfiguration in 11 NPSPAC Regions

On November 27, 2012, the FCC released a Public Notice announcing the completion of 800 MHz band reconfiguration in 11 NPSPAC regions for which the TA filed certifications that band reconfiguration is complete.⁶ It stated that the post-rebanding channel plan is now in effect in these regions and reminded licensees in these regions that have not completed all rebanding tasks (e.g., submitting cost documentation, completing the Actual Cost Reconciliation process, or closing their FRAs) that they must do so expeditiously.

Closing Process

The TA encourages licensees and Sprint Nextel to expeditiously complete Actual Cost Reconciliation ("ACR") and other closing process activities⁷ in accordance with the timeframes established in the Actual Cost Reconciliation Fact Sheet.⁸ Failure to do so can result in

⁵ See "Public Safety and Homeland Security Bureau Extends Voluntary 800 MHz Rebanding Negotiation Period for Wave 4 Border Area NPSPAC and Non-NPSPAC Licensees Along the U.S.-Mexico Border Pending Establishment of Negotiation Timetable," *Public Notice*, 27 FCC Rcd 7312, 7313 (2012) ("*Mexican Border Public Notice*").

⁶ See "Public Safety and Homeland Security Bureau and Wireless Telecommunications Bureau Announce the Completion of 800 MHz Band Reconfiguration in Certain NPSPAC Regions," *Public Notice*, 27 FCC Rcd 14775 (2012). The regions are NPSPAC Region 2: Alaska, Region 7: Colorado, Region 11: Hawaii, Region 15: Iowa, Region 22: Minnesota, Region 26: Nebraska, Region 32: North Dakota, Region 38: South Dakota, Region 41: Utah, Region 45: Wisconsin, and Region 46: Wyoming.

⁷ Closing process activities include modification of FCC licenses, equipment reconciliation, ACR, and the preparation, execution, and delivery of the closing documents, including an FRA Completion Certification.

⁸ The Fact Sheet is available at http://www.800TA.org/content/resources/ACR_Fact_Sheet.pdf.

significant program delays, misplaced or lost actual cost support documentation, and other issues that could substantially impact amounts owed by or due to Sprint Nextel.

Equipment reconciliation is part of the overall closing process. Licensees should consult their FRA closely and ensure they have complied with all requirements to return equipment that are provided for in the FRA, such as returning replaced equipment to Sprint Nextel or Motorola. If a licensee has not complied, it may be responsible, among other things, for paying the costs of the replacement equipment it received or for returning the replacement equipment.

Recognizing that licensee personnel responsible for completing physical reconfiguration are not always the same personnel that are responsible for completing ACR and closing PFAs and FRAs, the TA encourages licensees to involve the appropriate personnel early in the process. Licensees should document costs as they are incurred and not wait until after the completion of planning or physical retuning to begin the required documentation of costs. If licensees are unable to appropriately document costs (as specified in the TA's published guidance), the result may be either delayed payments to licensees or refunds due from licensees to Sprint Nextel. Delaying closing increases a licensee's risk of not getting paid. Furthermore, delays in completing the closing process extend the period during which a licensee may be subject to audit and is required to retain documents related to reconfiguration.

To assist licensees in the closing of FRAs and address delays in the closing process, the TA is conducting a direct calling campaign with licensees significantly impacted by these delays. Of the 348 licensees in the closing process, the TA has contacted 44 percent of these licensees to facilitate timely closing of the FRA. Of those, the TA is actively facilitating 39 percent of those FRAs while the rest have made additional progress in the closing process. Since the TA began the calling campaign, the TA has assisted the licensees in 40 deals in reaching the closed FRA milestone. The TA monitors the closing process and will continue to track a licensee's reconfiguration until it has completed the closing process and submitted an FRA Completion Certification.

Sprint Nextel's Petition for Declaratory Ruling

On January 22, 2013, Sprint Nextel filed a Petition for Declaratory Ruling ("Petition") requesting that the FCC declare that Sprint Nextel will not be required to make an anti-windfall payment to the U.S. Treasury because it has spent more than \$2.8 billion for reconfiguration and Broadcast Auxiliary Service ("BAS") relocation.⁹ The Petition also asks the FCC to direct the TA to conduct the reconfiguration program's financial reconciliation "true-up," to streamline certain financial aspects of the reconfiguration program, and to reduce the required minimum amount of the Letter of Credit from \$850 million to \$457 million. On January 25, 2013, the PSHSB released a Public Notice seeking comment on Sprint Nextel's Petition.¹⁰ Comments were due by February 25, 2013 and reply comments were due by March 11, 2013.

⁹ Sprint Nextel, "Petition for Declaratory Ruling," WT Docket No. 02-55 (filed Jan. 22, 2013).

¹⁰ See "Public Safety and Homeland Security Bureau Seeks Comment on Petition for Declaratory Ruling by Sprint Nextel Corporation Concerning 800 MHz Rebanding 'Anti-Windfall' Payment and Letter of Credit Minimum Amount," *Public Notice*, DA 13-98 (rel. Jan. 25, 2013).

I. PROGRAM-WIDE SNAPSHOT AND RECENT DEVELOPMENTS

This section provides a program-wide snapshot that summarizes the status of the 800 MHz band reconfiguration program. It describes two measures of program progress: Frequency Reconfiguration Agreement negotiations and reconfiguration implementation. It also discusses recent developments in the program, identifies program-wide issues, and, where applicable, describes specific actions that the FCC and the TA have taken to address issues identified to date.

A. Program Wide Snapshot

1. Frequency Reconfiguration Agreement Negotiations

The TA generally measures the progress of Frequency Reconfiguration Agreement negotiations in two ways: (1) the number of *FRAs* that have been negotiated and agreed to between licensees and Sprint Nextel and submitted to the TA; and (2) the number of *call signs* included in those FRAs.

An FRA specifies the reconfiguration activities and related costs for each licensee as well as the frequencies to be cleared. The bar chart below depicts the number of non-border FRAs that have been negotiated and submitted to the TA for Stage 1 (Channels 1-120 and Southeast ESMR channels) licensees and Stage 2 (NPSPAC and Expansion Band) licensees.

Chart 2: Non-border FRAs Submitted to the TA as of December 31, 2012¹¹

- Stage 1: 99 percent of non-border FRAs have been submitted to the TA
- Stage 2: 99 percent of non-border FRAs have been submitted to the TA

¹¹ Sprint Nextel is the data source for the number of expected FRAs. The estimate of total FRAs expected does not include FRAs for licensees affected by the international border areas for Canada and Mexico.

Chart 3 shows the number of Canadian Border Region FRAs that have been negotiated and submitted to the TA for Stage 1 (non-Public Safety) licensees and Stage 2 (NPSPAC and non-NPSPAC Public Safety) licensees.

Chart 3: Canadian Border FRAs Submitted to the TA as of December 31, 2012¹²

- Stage 1: 100 percent of Canadian border FRAs have been submitted to the TA
- Stage 2: 98 percent of Canadian border FRAs have been submitted to the TA

Chart 4 shows the number of call signs with frequencies in the Channels 1-120 and NPSPAC bands included in FRAs submitted to the TA.

¹² Sprint Nextel is the data source for the number of expected FRAs. Subscriber Equipment Deployment (“SED”) agreements are counted as submitted FRAs in this chart.

Chart 4: Call Signs in Submitted FRAs by Band¹³

Chart 4 includes non-border call signs and call signs within the Canadian and Mexican border regions. The number of outstanding Channels 1-120 and NPSPAC call signs not yet in FRAs reflects the material number of call signs to be reconfigured that are located in, or affected by, the Mexican border areas.

2. Reconfiguration Implementation

The TA generally measures the status of reconfiguration implementation, or physical retuning, in two ways: (1) the number of *FRAs* for which physical retuning is complete; and (2) the number of *call signs* that Sprint Nextel reports as being cleared by licensees.¹⁴

Chart 5 depicts the number of non-border FRAs for Stages 1 and 2 licensees for which Sprint Nextel has reported that physical retuning is complete.

¹³ Data is based on the FCC's ULS database. This chart does not include Expansion Band call signs.

¹⁴ As used in the context of implementation, the completion of physical retuning means the individual licensee has retuned its infrastructure to operate on its replacement frequencies and has cleared its old frequencies. The licensee may need to complete a second (or subsequent) touch of its subscriber units to remove the pre-rebanding channels. Cleared means that the licensee has retuned its base stations to its new channel assignments and commenced system operations on the new channels. Maps 2 and 3 and Appendix 2 have information on clearing by call sign.

Chart 5: Non-border FRAs with Physical Retuning Complete as of December 31, 2012

With physical retuning accomplished for 99 percent of non-border Stage 1 FRAs, Channels 1-120 clearing is nearly complete. Furthermore, 87 percent of the Stage 1 Channels 1-120 site-specific call signs were reported by Sprint Nextel as being cleared by licensees as of December 31, 2012. The difference between the percentages of *call signs* and *FRAs* is attributable to the fact that the FRA statistics do not include agreements in border areas, while the call sign statistics do include call signs in border areas.

NPSPAC system reconfigurations often involve complex system designs and interoperability requirements among numerous licensees in a region and generally require more time and coordination than was needed for Stage 1 systems. As of December 31, 2012, the licensees in 86 percent of non-border Stage 2 FRAs had completed their physical retunes and transitioned to their new channels. Furthermore, 50 percent of Stage 2 call signs were reported by Sprint Nextel as being cleared by licensees as of December 31, 2012. The difference between the percentages of *call signs* and *FRAs* is attributable to the fact that the FRA statistics do not include agreements in border areas, while the call sign statistics do include call signs in border areas. The retuning of base stations to a licensee's new channel assignments and commencement of system operations on the new channels is a significant milestone because it means that the main goal of the reconfiguration process – separating Public Safety and commercial cellular operations – has been achieved.

Chart 6 shows the number of Canadian Border Region FRAs for Stages 1 and 2 licensees for which Sprint Nextel has reported that physical retuning is complete.

Chart 6: Canadian Border FRAs with Physical Retuning Complete as of December 31, 2012

Physical retuning was complete for 92 percent of Canadian border Stage 1 FRAs as of December 31, 2012.

As with non-border NPSPAC licensees, reconfiguration of Canadian border Stage 2 licensees often involves complex system designs and interoperability requirements among numerous licensees in a region and generally requires more time and coordination than is needed for Stage 1 reconfiguration. Furthermore, certain Stage 1 licensees need to complete their physical retuning in order to clear replacement channels for NPSPAC licensees. As of December 31, 2012, the licensees in 46 percent of Canadian border Stage 2 FRAs had completed their physical retunes and transitioned to their new channels.

B. Recent Developments

1. Certifications of Completion of Band Reconfiguration

The TA has certified that band reconfiguration is complete in 11 NPSPAC regions pursuant to the requirements in the *Report and Order* and the FCC's rules.¹⁵ The certifications mean that all licensees in these regions that were subject to reconfiguration have relocated to their new channels and modified their FCC licenses to delete their old frequencies or cancelled their licenses. This also includes modifications to Sprint Nextel's network and licenses to cease operations below the ESMR band and modify or cancel all relevant licenses to remove any authority to operate below the ESMR band. Furthermore, all of the frequencies in all 800 MHz

¹⁵ The regions are NPSPAC Region 2: Alaska, Region 7: Colorado, Region 11: Hawaii, Region 15: Iowa, Region 22: Minnesota, Region 26: Nebraska, Region 32: North Dakota, Region 38: South Dakota, Region 41: Utah, Region 45: Wisconsin, and Region 46: Wyoming.

sub-bands (*i.e.*, NPSPAC, Interleaved, Expansion, Guard, and ESMR bands) in the regions that were subject to reconfiguration have been cleared.

The certifications noted that licensees may not have completed all tasks associated with rebanding. Licensees in the regions still may need to complete a second (or subsequent) touch of their subscriber units to remove the pre-rebanding channels, submit final reconfiguration cost documentation to Sprint Nextel and/or the TA, complete the ACR process, or close their FRAs in order for them to complete their individual reconfiguration activities.

On November 27, 2012, the FCC released a Public Notice announcing the completion of 800 MHz band reconfiguration in the 11 NPSPAC regions for which the TA filed certifications.¹⁶ It stated that the post-rebanding channel plan is now in effect in these regions and reminded licensees in these regions that have not completed all rebanding tasks (e.g., submitting cost documentation, completing the ACR process, or closing their FRAs) that they must do so expeditiously. The FCC announced that the remaining Interleaved Band channels vacated by Sprint Nextel and channels in the Expansion Band and Guard Band in these 11 regions would be available for licensing on January 17, 2013.

2. Financial True-Up Date

On November 15, 2012, the TA filed a report with the PSHSB recommending that the 800 MHz reconfiguration financial reconciliation “true-up” deadline be extended from December 31, 2012 until July 1, 2013.¹⁷ The TA stated that a true-up as of December 31, 2012 “would be incomplete and would not include a significant amount of Sprint Nextel’s reconfiguration expenditures.”¹⁸ The TA further stated that “the true-up remains premature at this time and that additional rebanding expenditures are required to provide a meaningful report of Sprint Nextel’s total rebanding costs for both the 800 MHz rebanding and for the relocation of BAS licensees.”¹⁹ The TA proposed to file a report with the PSHSB by May 15, 2013 with its recommendation: (1) whether reconfiguration has made sufficient progress that conducting the true-up as of July 1, 2013 would be appropriate; or (2) whether the “true-up” deadline should be extended for an additional period.

On December 21, 2012, the PSHSB released an Order postponing the true-up date from December 31, 2012 until July 1, 2013.²⁰ The PSHSB required the TA to file a report by May 15, 2013 with its recommendation on whether the true-up should be conducted as of July 1, 2013 or

¹⁶ See “Public Safety and Homeland Security Bureau and Wireless Telecommunications Bureau Announce the Completion of 800 MHz Band Reconfiguration in Certain NPSPAC Regions,” *Public Notice*, 27 FCC Rcd 14775 (2012).

¹⁷ See Letter from Brett S. Haan, TA, to David L. Furth, PSHSB, WT Docket No. 02-55 (filed Nov. 15, 2012).

¹⁸ *Id.* at 1.

¹⁹ *Id.* at 2.

²⁰ See Improving Public Safety Communications in the 800 MHz Band, WT Docket No. 02-55, *Order*, DA 12-2070, at ¶ 1 (rel. Dec. 21, 2012).

be further postponed. In the event that the true-up is conducted based on expenditures as of July 1, 2013, the PSHSB directed the TA to submit its final true-up report by December 31, 2013.

3. Requests for Waiver of Rebanding Completion Deadline

a. Non-Border Licensees

Non-border licensees with executed FRAs that did not timely complete the physical reconfiguration of their systems were required to request additional time from the PSHSB by filing a supplemental request for waiver of the rebanding completion deadline. Affected licensees filed supplemental requests for waiver with the PSHSB and were directed to provide copies of the filings to the TA and Sprint Nextel. During the fourth quarter, the TA received 58 supplemental requests for waiver from non-border licensees that were filed with the PSHSB.²¹

On August 9, 2012, the PSHSB released an Order addressing non-border licensees' supplemental requests for waiver of the rebanding completion deadline that were filed since October 3, 2011.²² The PSHSB separately addressed the waiver requests of licensees with executed FRAs and licensees without FRAs. The PSHSB granted waivers, in whole or in part, to licensees with executed FRAs, granting a specific waiver date to each licensee. The PSHSB granted the waiver dates requested by licensees that proposed to complete their rebanding by April 15, 2013. For licensees seeking extensions beyond April 15, 2013, the PSHSB granted partial waivers until April 15, 2013 for licensees to either complete reconfiguration or file a supplemental request for waiver at that time. The PSHSB directed licensees with executed FRAs that did not file a supplemental request for waiver or that filed a waiver request in which the requested extension date has passed to either provide the TA with documentation showing they have completed reconfiguration or file a supplemental request for waiver by September 10, 2012. In addition, the PSHSB directed the one non-border licensee that has not executed an FRA to submit a rebanding schedule to the PSHSB within 30 days of executing its FRA.

Non-border licensees with executed FRAs that will not complete the physical reconfiguration of their systems by their waiver date must request additional time from the PSHSB by filing a supplemental request for waiver at that time. Such licensees will be required to detail their progress to date and propose milestone dates for completing each major reconfiguration step (*e.g.*, subscriber unit deployment, infrastructure retuning, system cut-over, and post-cutover modifications) that has not been completed. Licensees should use the TA's Request for Waiver template in preparing their supplemental requests for waiver.²³ Licensees should email supplemental requests for waiver to the PSHSB at PSHSB800@fcc.gov. Licensees must provide copies of the requests to the TA at Waivers@800TA.org and to Sprint Nextel at 800MHZ@sprint.com.

²¹ The TA has created a webpage that provides information on the requests for waiver received by the TA. The link to this page can be found on the TA's website at <http://www.800TA.org/content/resources/tools.asp>.

²² See Improving Public Safety Communications in the 800 MHz Band; Supplemental Requests for Waiver of June 26, 2008 Rebanding Deadline for Non-Border Regions and March 19, 2012 Rebanding Deadline for Puerto Rico, Order, 27 FCC Rcd 9237 (2012) ("*Non-Border and Puerto Rico Waiver Order*").

²³ The template is available on the TA's website at <http://www.800TA.org/content/resources/forms.asp>.

b. **Canadian Border Region Licensees**

Canadian Border Region licensees with executed FRAs that did not timely complete physical reconfiguration were required to request additional time from the PSHSB by filing a supplemental request for waiver of the rebanding completion deadline.²⁴ During the fourth quarter, the TA received 26 requests for waiver from Canadian Border Region licensees that were filed with the PSHSB.

On August 9, 2012, the PSHSB released an Order addressing Canadian Border Region licensees' supplemental requests for waiver that were filed since December 5, 2011.²⁵ The PSHSB separately addressed the waiver requests of licensees with executed FRAs and licensees without FRAs. The PSHSB granted waivers, in whole or in part, to licensees with executed FRAs, granting a specific waiver date to each licensee. The PSHSB granted the waiver dates requested by licensees that proposed to complete their rebanding by April 15, 2013. For licensees seeking extensions beyond April 15, 2013, the PSHSB granted partial waivers until April 15, 2013 for licensees to either complete reconfiguration or file a supplemental request for waiver at that time. The PSHSB directed licensees that were previously granted waivers because a "downstream" licensee blocked their replacement channels to complete physical reconfiguration by December 3, 2012 or file a supplemental request for waiver. The PSHSB directed licensees with executed FRAs that did not file a supplemental request for waiver or that filed a waiver request in which the requested extension date has passed to either provide the TA with documentation showing they have completed reconfiguration or file a supplemental request for waiver by September 10, 2012.

The PSHSB held in abeyance the waiver requests of licensees without executed FRAs and directed such licensees to take further action. Licensees that submitted a cost estimate, but had not executed an FRA, were required to either execute an FRA by October 23, 2012 or submit to the TA a report regarding the status of FRA negotiations, including a schedule for completing negotiations and a brief summary of the issues in dispute. Within 30 days of executing an FRA, these licensees must file a supplemental request for waiver. Licensees without a cost estimate were required to either submit a cost estimate by October 9, 2012 or provide the PSHSB with a report explaining why they cannot provide a cost estimate, together with a schedule detailing when they anticipate submitting a cost estimate.

Canadian Border Region licensees with executed FRAs that will not complete the physical reconfiguration of their systems by their waiver date granted by the PSHSB must request additional time from the PSHSB by filing a supplemental request for waiver at that time. Such licensees will be required to detail their progress to date and propose milestone dates for

²⁴ See Improving Public Safety Communications in the 800 MHz Band; Requests for Waiver of the April 14, 2011 Rebanding Deadline in Regions Along the U.S.-Canada Border, *Order*, 26 FCC Rcd 16382 (2011). Licensees that cannot complete rebanding because a "downstream" licensee is blocking their replacement channels, and licensees whose rebanding completion deadline was tolled because their FRA approval was delayed due to a frequency conflict with stations in Canada, were not required to file a supplemental request for waiver at that time.

²⁵ See Improving Public Safety Communications in the 800 MHz Band; Requests for Waiver of April 14, 2011 Rebanding Deadline in Regions Along the U.S.-Canada Border, *Order*, 27 FCC Rcd 9251 (2012).

completing each major reconfiguration step (*e.g.*, subscriber unit deployment, infrastructure retuning, system cut-over, and post-cutover modifications) that has not been completed. Licensees should use the TA's Request for Waiver template in preparing their supplemental requests for waiver.²⁶ Licensees should email supplemental requests for waiver to the PSHSB at PSHSB800@fcc.gov. Licensees must provide copies of the requests to the TA at Waivers@800TA.org and to Sprint Nextel at 800MHZ@sprint.com.

c. **Puerto Rico Licensees**

Puerto Rico licensees that did not complete timely physical reconfiguration were required to file a request for waiver of that deadline with the PSHSB. During the fourth quarter, the TA received nine requests for waiver from Puerto Rico licensees that were filed with the PSHSB.

On August 9, 2012, the PSHSB released an Order addressing Puerto Rico licensees' requests for waiver.²⁷ The PSHSB granted waivers to licensees with executed FRAs, granting a specific waiver date to each licensee, with December 31, 2012 as the latest waiver date granted. The PSHSB directed licensees with executed FRAs that did not file a request for waiver or that filed a waiver request in which the requested extension date has passed to either provide the TA with documentation showing they have completed reconfiguration or file a supplemental request for waiver by September 10, 2012.

Puerto Rico licensees that will not complete the physical reconfiguration of their systems by their waiver date granted by the PSHSB must request additional time from the PSHSB by filing a supplemental request for waiver at that time. Such licensees will be required to detail their progress to date and propose milestone dates for completing each major reconfiguration step (*e.g.*, subscriber unit deployment, infrastructure retuning, system cut-over, and post-cutover modifications) that has not been completed. Licensees should use the TA's Request for Waiver template in preparing their supplemental requests for waiver.²⁸ Licensees should email supplemental requests for waiver to the PSHSB at PSHSB800@fcc.gov. Licensees must provide copies of the requests to the TA at Waivers@800TA.org and to Sprint Nextel at 800MHZ@sprint.com.

4. **U.S.-Mexico Border Region**

On June 8, 2012, the FCC announced that the United States and Mexico signed an amended Protocol for sharing spectrum in the 800 MHz band along the U.S.-Mexico border, which paves the way for completion of reconfiguration by licensees operating along the U.S.-Mexico border.²⁹ On August 17, 2012, the PSHSB released a *Fourth FNPRM* seeking comment

²⁶ The template is available on the TA's website at <http://www.800TA.org/content/resources/forms.asp>.

²⁷ See *Non-Border and Puerto Rico Waiver Order*.

²⁸ The template is available on the TA's website at <http://www.800TA.org/content/resources/forms.asp>.

²⁹ See "FCC Announces Two Spectrum-Sharing Agreements with Mexico Enabling Advanced Public Safety and Commercial Communications in the Mexico Border Area," *News Release* (June 8, 2012).

on proposals for establishing and implementing the reconfigured 800 MHz band plan along the U.S.-Mexico border.³⁰ Comments and reply comments on the *Fourth FNPRM* have been filed.

The PSHSB issued a Public Notice on June 29, 2012, modifying the schedule for Wave 4 non-NPSPAC (Stage 1) and NPSPAC (Stage 2) licensees along the U.S.-Mexico border.³¹ The PSHSB extended the voluntary negotiation period and postponed the start of the mediation period until it establishes a mandatory negotiation timetable for these licensees. The PSHSB also extended the filing freeze on new applications in the U.S.-Mexico border region until it establishes a rebanding timeline for the region and specifies a date by which it can again begin accepting new applications. The extension of voluntary negotiations and the application freeze does not apply to Wave 4 licensees along the U.S.-Mexico border that have received proposed replacement frequencies from the TA.

Mexican border licensees should take action to prepare and plan for reconfiguration. The FCC has encouraged Mexican border licensees to engage in planning and negotiation activities to the extent that they are not frequency-dependent and would not result in unnecessary duplication of costs.³² Licensees should submit a Point of Contact Form to the TA, review and update their license information in the FCC's ULS database, and identify and contact vendors and consultants to assist with reconfiguration. Licensees may conduct the following non-frequency-dependent activities: conducting subscriber unit inventory, conducting infrastructure inventory, engaging in non-frequency-specific engineering and implementation planning, and defining their interoperability environment. If planning funding is required, licensees should submit an RFPF and negotiate a PFA with Sprint Nextel. Licensees may submit an RFPF prior to receiving replacement frequencies. In addition, the TA encourages licensees to review information on the TA's website (<http://www.800TA.org>) regarding the reconfiguration process.

As of December 31, 2012, 16 PFAs, with a total contract value, including amendments, of \$6.6 million, were approved by the TA for licensees in or adjacent to the Mexico border region. In addition, as of December 31, 2012, the TA had approved SED agreements and FRAs with a total contract value, including amendments, of \$11.5 million for licensees in or adjacent to the Mexico border region.³³

5. Vacated Channels and NPSPAC Clearing

The FCC tasked the TA with monitoring the NPSPAC clearing process in its October 30, 2008 Order.³⁴ Sprint Nextel cleared channels in the 809-809.5/854-854.5 MHz band in non-border NPSPAC regions, and this spectrum was made available to Public Safety licensees,

³⁰ See *Fourth FNPRM*.

³¹ See *Mexican Border Public Notice*.

³² See *id.*, 27 FCC Rcd at 7313.

³³ The agreements do not include frequency-dependent activities.

³⁴ See Improving Public Safety Communications in the 800 MHz Band; Relinquishment By Sprint Nextel of Channels in the Interleaved, Expansion, and Guard Bands, *Order*, 23 FCC Rcd 15966 ¶ 18 (2008) ("*October 2008 Interleaved Order*").

beginning on January 28, 2009.³⁵ Based on additional clearing of channels in the old NPSPAC band in certain NPSPAC regions, channels in the 809.5-815/854.5-860 MHz band in certain NPSPAC regions were relinquished by Sprint Nextel and made available to Public Safety licensees starting on December 2, 2009 and additional channels were made available on December 16, 2010.³⁶ Additional locations were made available on June 1, 2011.³⁷

The FCC's *October 2008 Interleaved Order* also required Sprint Nextel to relinquish its non-border spectrum in the Interleaved Band (809-815/854-860 MHz) by March 31, 2010. Although Sprint Nextel requested and was granted waivers of the deadline for vacating the Interleaved Band in 21 NPSPAC regions initially³⁸ and later in nine NPSPAC regions,³⁹ the deadlines for Sprint Nextel to vacate the Interleaved Band have passed. Sprint Nextel was required to relinquish its non-border spectrum in the Interleaved Band as of March 31, 2012.⁴⁰ On November 27, 2012, the FCC announced that on January 17, 2013 it would begin accepting applications for licensing of the remaining channels in the 809.5-815/854.5-860 MHz band that have been relinquished by Sprint Nextel in certain NPSPAC regions, which were not previously released.⁴¹

As NPSPAC licensees modify their licenses to clear channels in the old NPSPAC band and reach certain clearing benchmarks in regions, Sprint Nextel will vacate additional Expansion Band and Guard Band spectrum in those regions. The TA is monitoring the clearing of channels in the old NPSPAC band. During the fourth quarter, 14 NPSPAC regions showed increased

³⁵ See "Public Safety and Homeland Security Bureau Announces Application and Licensing Procedures for Channels Relinquished by Sprint Nextel Corporation in the 809-809.5/854-854.5 MHz Band," *Public Notice*, 23 FCC Rcd 18343 (2008).

³⁶ See "Public Safety and Homeland Security Bureau Announces Application and Licensing Procedures for Certain Channels Relinquished by Sprint Nextel Corporation in the 809.5-815/854.5-860 MHz Band," *Public Notice*, 24 FCC Rcd 13236 (2009); see also "Public Safety and Homeland Security Bureau Announces Application and Licensing Procedures for Certain Channels Relinquished by Sprint Nextel Corporation in the 809.5-815/854.4-860 MHz Band," *Public Notice*, 25 FCC Rcd 16038 (2010).

³⁷ See "Public Safety and Homeland Security Bureau Announces the Opening of Filing Window for Additional Locations Relinquished by Sprint Nextel Corporation in the 809.5-815/854.4-860 MHz Band Segment," *Public Notice*, 26 FCC Rcd 6639 (2011).

³⁸ See Improving Public Safety Communications in the 800 MHz Band; Relinquishment By Sprint Nextel of Channels in the Interleaved, Expansion, and Guard Bands, *Order*, 25 FCC Rcd 3270 (2010) ("*March 31, 2010 Interleaved Order*").

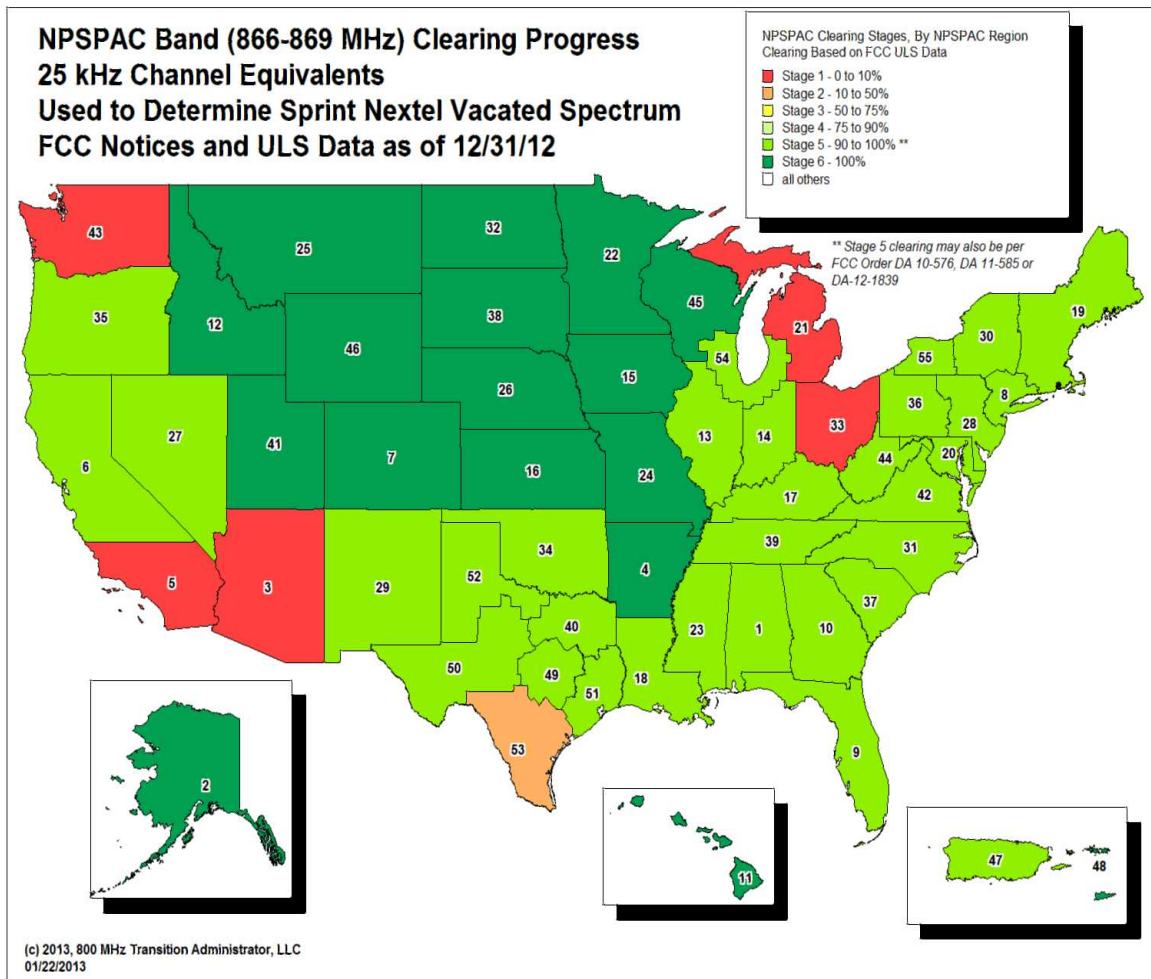

³⁹ See Improving Public Safety Communications in the 800 MHz Band; Relinquishment By Sprint Nextel of Channels in the Interleaved, Expansion, and Guard Bands, *Order*, 26 FCC Rcd 5004 (2011) ("*March 31, 2011 Interleaved Order*").

⁴⁰ Sprint Nextel may remain on Interleaved Band channels, but must vacate any channel on 60 days notice that a Public Safety licensee is prepared to commence operating on the channel. See *October 2008 Interleaved Order*, 23 FCC Rcd at 15974 ¶ 19.

⁴¹ See "Public Safety and Homeland Security Bureau Announces Application and Licensing Procedures for Channels in Non-Border Regions Relinquished by Sprint Nextel Corporation in the 809.5-815/854.5-860 MHz Band," *Public Notice*, 27 FCC Rcd 14785 (2012) ("*November 2012 Interleaved Public Notice*").

clearing,⁴² with 12 regions moving to a higher stage, of which 11 regions were primarily due to an FCC Public Notice and one region was because of incremental clearing.⁴³ Map 1 contains information about the status of clearing of channels in the old NPSPAC band in each region.

Map 1: NPSPAC Clearing Progress as of December 31, 2012⁴⁴

Additional information is available in Appendix 2.

⁴² Most notable among the 14 regions increasing their clearing percentage were Region 51: Texas - Houston with a 61 percent increase, Region 6: California - North with a 27 percent increase, and Region 20: Maryland; Washington, DC; Virginia – Northern with a 19 percent increase. See Appendix 2 which contains tables detailing the progress in clearing NPSPAC Regions and frequencies.

⁴³ Region 24: Missouri reached Stage 6 through incremental clearing. The 11 other regions were effectively moved to Stage 5 by the *November 2012 Interleaved Public Notice*.

⁴⁴ The percentages for the stages noted in Map 1 were modified by the FCC's *March 31, 2010 Interleaved Order* and the data in the map reflects those percentages and stages. Pursuant to that Order, the FCC's *March 31, 2011 Interleaved Order*, and the *November 2012 Interleaved Public Notice*, certain NPSPAC regions were classified as Stage 5 without regard to the percentage of actual clearing of NPSPAC channels. Appendix 2 contains a map that shows stages based on actual clearing of NPSPAC channels.

II. QUARTERLY UPDATE

This section highlights the key areas within each stage and provides financial and support information about the program.

A. Update by Stage and Wave

The status of implementation for Stage 1 systems has a direct effect on the pace of reconfiguration for Stage 2 systems. Stage 1 licensees must be relocated off their frequencies in the lower 1-120 channel portion of the 800 MHz band before Stage 2 NPSPAC licensees can move to their new frequencies in that portion of the 800 MHz band. This interdependency of reconfiguration progress between Stages 1 and 2 is consistent across all four waves.

1. Stage 1 (Channels 1-120)

a. Planning and Negotiations

As of December 31, 2012, 54 PFAs, with a total contract value, including amendments, of \$7.7 million, were approved by the TA for non-border Stage 1 licensees.

The negotiation of FRAs for non-border Stage 1 licensees is virtually completed. As of December 31, 2012, 924 FRAs (99 percent) have been submitted to the TA out of the 926 FRAs anticipated for non-border Stage 1 licensees. The TA has approved 924 FRAs with a contract value, including amendments, totaling \$84.2 million. Appendix 1A provides additional information about the status of FRA negotiations for non-border Channels 1-120 licensees.

In Stage 1, there were no mediation dockets (or “cases”) pending as of December 31, 2012.

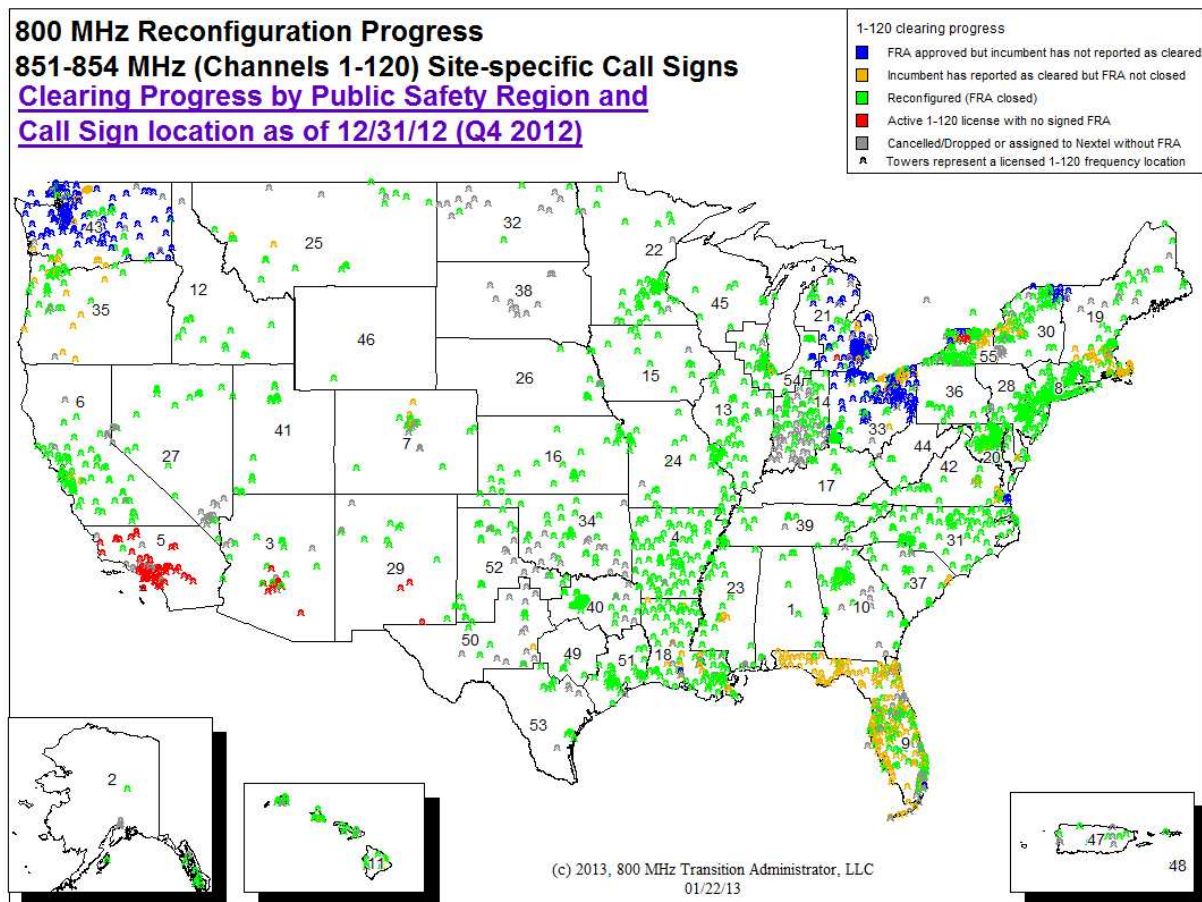

b. Reconfiguration Implementation

As of December 31, 2012, Sprint Nextel reported that physical retuning is complete for 920 non-border Stage 1 FRAs out of the 926 FRAs anticipated for Stage 1, which is 99 percent of non-border Channels 1-120 FRAs. Certain Public Safety licensees in Stage 1 have elected to retune their Stage 1 facilities along with their Stage 2 facilities.

As of December 31, 2012, 87 percent of the Stage 1 Channels 1-120 site-specific call signs were reported by Sprint Nextel as being cleared by licensees. The difference between the percentages of call signs and FRAs is due to the FRA statistics not including agreements in border areas, while the call sign statistics do include call signs in border areas, with the majority of outstanding call signs being in border-affected areas as shown in Map 2. As of December 31, 2012, there were 43 NPSPAC regions in which 100 percent of the Channels 1-120 call signs were cleared.

Map 2 shows the progress of clearing Channels 1-120 to allow relocation of the NPSPAC band, with material progress in all areas of the country outside the areas affected by the Mexico border region.

Map 2: Channels 1-120 Locations and Reconfiguration Status, by NPSPAC Region as of December 31, 2012⁴⁵

2. Stage 2 (NPSPAC and Expansion Band)

a. Planning and Negotiations

In Stage 2, approximately half of the licensees sought planning funding and negotiated PFAs. As of December 31, 2012, 430 PFAs, with a total contract value, including amendments, of \$77.3 million, were approved by the TA for non-border Stage 2 licensees.

As shown in Table 1, as of December 31, 2012, 850 FRAs (99 percent) have been submitted to the TA out of the 852 FRAs anticipated for non-border Stage 2 licensees. The TA has approved 850 FRAs with a contract value, including amendments, totaling \$791.3 million.

⁴⁵ The licensee clearing information is provided by Sprint Nextel. Some regions adjacent to international borders will not reach 100 percent until revised border area band plans are available. Locations noted on the map are based upon ULS data regarding Channels 1-120 licensing as of November 2004.

The last remaining Stage 2 licensee without an FRA was unable to reach agreement with Sprint Nextel, and the matter was referred to the FCC for *de novo* review.

Table 1: Status of Reconfiguration for Stage 2 (NPSPAC and Expansion Band) Licensees as of December 31, 2012 (milestones achieved by number of FRAs)⁴⁶

Wave	Stage 2 Anticipated FRAs*	FRA Negotiations and Approval			Reconfiguration Implementation				
		FRAs Submitted to TA	FRAs Approved by TA	% of Anticipated FRAs Approved by TA	# of FRAs with Physical Retunes Reported as Completed	% of Anticipated FRAs with Physical Retune Reported as Completed	Completion Certifications Submitted to TA	Completion Certifications Assessed by TA	% of Anticipated FRAs with Completion Certifications Assessed by TA
Wave 1	355	354	354	99%	295	83%	182	181	51%
Wave 2	225	225	225	100%	203	90%	117	117	52%
Wave 3	228	227	227	99%	191	84%	80	79	35%
Wave 4	44	44	44	100%	41	93%	21	21	48%
Total	852	850	850	99%	730	86%	400	398	47%

* This table does not include any estimate of FRAs that will include call signs in or affected by the FCC-defined border areas.

Table 2 provides Stage 2 status information in terms of the number of call signs that have achieved particular milestones.

⁴⁶ Sprint Nextel is the data source for the estimated number of anticipated FRAs in column 2 and the number of FRAs with physical retunes reported as completed in column 6. The figures have not been verified by the TA. Any changes to the number of anticipated FRAs from previous Quarterly Progress Reports are the result of how Sprint Nextel structures deals with licensees (*i.e.*, deals cancelled or consolidated). Given that some FRAs noted in the table are for licensees with mobile-only systems, there will be a difference between the number of FRAs and the number of FRAs reporting frequencies cleared.

**Table 2: Status of Reconfiguration for Licensees in Stage 2 (NPSPAC and Expansion Band)
as of December 31, 2012 (milestones achieved by number of call signs)**

Wave	Stage 2 Call Signs*	FRA Negotiations and Approval			Reconfiguration Implementation				
		# in FRAs Submitted to TA	# in FRAs Approved by TA	% in FRAs Approved by TA	# Reported as Cleared by Licensee	% Reported as Cleared by Licensee	Completion Certifications Submitted to TA	Completion Certifications Assessed by TA	% with Completion Certifications Assessed by TA
Wave 1	2231	2218	2218	99%	1397	63%	709	703	32%
Wave 2	941	938	938	99%	824	86%	219	219	23%
Wave 3	1290	1238	1238	96%	595	46%	223	218	17%
Wave 4	1985	1416	1416	71%	411	21%	325	325	16%
Total	6447	5810	5810	90%	3227	50%	1476	1465	23%

* Includes call signs in the FCC-defined international border areas.

(i) **Wave 1**

Wave 1, Stage 2 is the largest of the NPSPAC channel reconfiguration waves. As shown in Table 1 above, as of December 31, 2012, 99 percent of the FRAs expected for Wave 1, Stage 2 have been approved by the TA. As of December 31, 2012, all of the 337 mediation dockets opened for Wave 1, Stage 2 licensees had been resolved.

(ii) **Wave 2**

As shown in Table 1 above, as of December 31, 2012, 100 percent of the FRAs expected for Wave 2, Stage 2 have been approved by the TA. As of December 31, 2012, all of the 235 mediation dockets opened for Wave 2, Stage 2 licensees had been resolved.

(iii) **Wave 3**

Besides NPSPAC licensees, Wave 3, Stage 2 includes certain licensees with Southeast ESMR Band frequencies that were deferred from Wave 3, Stage 1 at the licensee's request.⁴⁷ As shown in Table 1 above, as of December 31, 2012, approximately 99 percent of the FRAs expected for Wave 3, Stage 2 have been approved by the TA.

The Wave 3, Stage 2 mediation period began on May 1, 2007. As of December 31, 2012, of the 272 mediation dockets opened for Wave 3, Stage 2 licensees, 271 mediation dockets had been resolved. The one remaining licensee was unable to negotiate an FRA with Sprint Nextel and the matter was referred to the FCC for *de novo* review.

⁴⁷ Wave 3, Stage 1 licensees whose Wave 3 ESMR Negotiation Deferral Requests were granted in June 2006 had their negotiations and reconfiguration implementation deferred to Wave 3, Stage 2.

(iv) **Wave 4**

As shown in Table 1 above, as of December 31, 2012, 100 percent of the non-border area FRAs expected for Wave 4, Stage 2 have been approved by the TA. The expected FRAs for Wave 4, Stage 2 licensees with systems located in, or affected by, the international border areas with Canada and Mexico are not included in the FRA statistics for Wave 4. As of December 31, 2012, all of the 66 mediation dockets opened for non-border area Wave 4, Stage 2 licensees had been resolved.

b. **Reconfiguration Implementation**

Non-border Stage 2 licensees continue to make progress with their implementation activities.

(i) **Implementation Planning Sessions**

One of the TA's methods for facilitating implementation activities has been to conduct regional Implementation Planning Sessions. These sessions bring together Public Safety licensees, their equipment vendors, technical consultants, and Sprint Nextel to develop consolidated implementation schedules. The FCC requires licensees that have not completed reconfiguration to participate in IPS in their region, if offered.⁴⁸

During the sessions, the TA works with licensees to develop implementation schedules for the regions that identify key milestones and dependencies associated with reconfiguration implementation activities. The sessions help licensees adjust implementation schedules to deal with complicated interconnections and interdependencies of shared networks – particularly setting dates for retuning mutual aid channels used by neighboring municipalities. IPS have also been helpful in enabling parties to reach an understanding on the timing of clearing and surrendering frequencies for those licensees that are ready to transition to the new channels.

The TA did not conduct any IPS for non-border licensees during the fourth quarter. To date, the TA has held 45 IPS for non-border licensees in 31 NPSPAC regions, which have been attended by 630 licensees, operating approximately 1.4 million radios.⁴⁹ Licensees that have participated in IPS should continue to move forward with and complete their implementation activities in accordance with the regional schedule developed at the session.

⁴⁸ See Improving Public Safety Communications in the 800 MHz Band; Supplemental Requests for Waiver of the June 26, 2008 Rebanding Deadline, *Order*, 24 FCC Rcd 7761, 7765 ¶ 9 (2009); see also “FCC Announces Supplemental Procedures and Provides Guidance for Completion of 800 MHz Rebanding,” *Public Notice*, 22 FCC Rcd 17227, 17230 (2007) (stating that NPSPAC licensees “are expected to participate” in IPS).

⁴⁹ The TA conducted 19 IPS in Wave 1 NPSPAC regions attended by 202 licensees, 12 IPS in Wave 2 NPSPAC regions attended by 185 licensees, and 14 IPS in Wave 3 NPSPAC regions attended by 224 licensees.

(ii) **Reconfiguration of Subscriber Equipment**

A key component of reconfiguration implementation is the retuning, reflashing, and/or replacement of subscriber equipment. Non-border Stage 2 licensees retuned, reflashed, or replaced approximately 30,000 radios (first touches) in the fourth quarter of 2012, raising the total number to approximately 1,472,000 radios (first touches) as of December 31, 2012.

(iii) **Infrastructure Retuning and System Cutover**

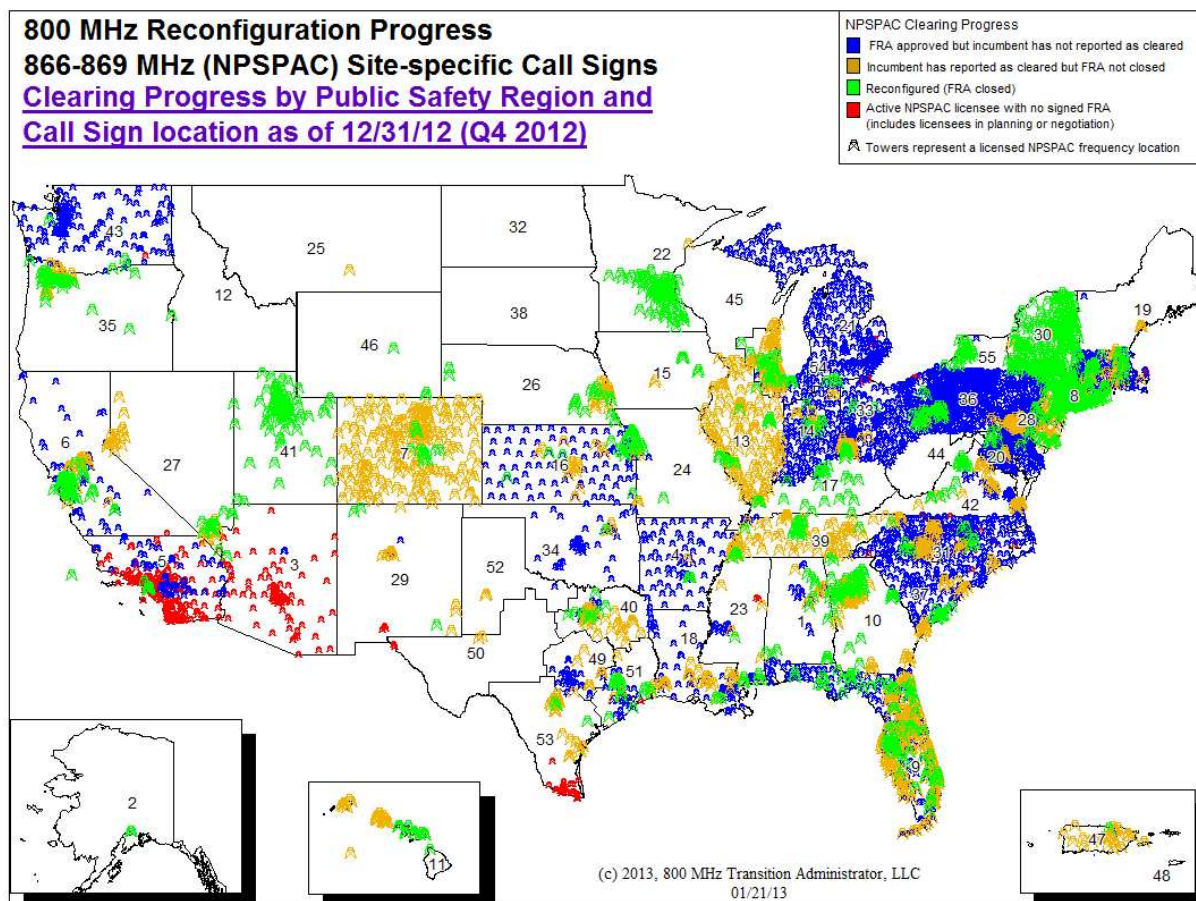

Another significant milestone in the implementation process is the retuning of base stations to the licensee's new channel assignments and commencement of system operations on the new channels. During the fourth quarter of 2012, there were an additional 19 non-border Stage 2 FRAs for which licensees reported their physical retunes as complete. Of the 852 FRAs expected for non-border Stage 2, there were 730 FRAs as of December 31, 2012 for which licensees had completed their physical retunes and transitioned to their new channels.⁵⁰ This does not consider licensees with post-cutover subscriber unit second touches or other technical work. As of December 31, 2012, physical retuning was complete for 86 percent of non-border Stage 2 FRAs (an increase from 84 percent as of September 30, 2012).

As of December 31, 2012, 50 percent of Stage 2 call signs were reported by Sprint Nextel as being cleared by licensees, which includes call signs in the border areas. The difference between the numbers by percentages of call signs and FRAs is again due to the fact that the FRA statistics do not include agreements in border areas, while the call sign statistics do include border area call signs.

Map 3 graphically depicts NPSPAC reconfiguration progress, as of December 31, 2012, by licensed NPSPAC locations. Progress on Expansion Band clearing is detailed in Appendix 2.

⁵⁰ The FRA totals for non-border Stage 2 include 27 FRAs for agencies that are users on another licensee's radio system. These agencies have no channels to clear and therefore will not achieve the milestone used by Sprint Nextel and the TA to measure the completion of physical retuning for purposes of these metrics.

Map 3: NPSPAC Locations and Reconfiguration Status, by NPSPAC Region as of December 31, 2012⁵¹

3. Canadian Border Regions

The 30-month transition period for reconfiguration of licensees in the U.S.-Canada border regions began on October 14, 2008.⁵² The TA's Implementation Plan and Timetable for the Reconfiguration of the 800 MHz Band in the U.S.-Canada Border Regions ("Implementation Plan") established two stages for the reconfiguration of Canadian border licensees.⁵³ Stage 1

⁵¹ This map shows frequency clearing as reported by the licensee to Sprint Nextel. Licensees generally report clearing before they file license modifications to delete cleared frequencies. Map 1 reflects clearing based on ULS licensing data, which is the basis for determining the release of additional Interleaved Band, Expansion Band, and Guard Band spectrum by Sprint Nextel.

⁵² See "Public Safety and Homeland Security Bureau Announces that the 30-Month Transition Period for 800 MHz Band Reconfiguration in Regions Along the U.S.-Canada Border will Commence on October 14, 2008," *Public Notice*, 23 FCC Rcd 14877 (2008) ("Canadian Border Public Notice").

⁵³ See 800 MHz Transition Administrator, LLC, "Implementation Plan and Timetable for the Reconfiguration of the 800 MHz Band in the U.S.-Canada Border Regions," WT Docket No. 02-55 (filed Oct. 1, 2008), *available at*

includes non-Public Safety licensees, such as Business, Industrial and Land Transportation (“B/ILT”) and Specialized Mobile Radio (“SMR”) licensees. Stage 2 is comprised of both NPSPAC and non-NPSPAC Public Safety licensees. The Canadian border reconfiguration also includes clearing of channels in the 854-860 MHz range for Public Safety use and reconfiguration of frequencies in the 861-865 MHz range to separate ESMR systems into the higher portion of the band. The exact frequencies being reconfigured vary in each FCC-defined Canadian Border Region. The TA continued its efforts to support Canadian border region reconfiguration during the fourth quarter by using the mediation process to assist licensees and Sprint Nextel in negotiating FRAs and by addressing frequency issues raised by licensees.

On October 12, 2012, the PSHSB released a Public Notice in which it extended the filing freeze on new non-rebanding-related 800 MHz applications along the U.S.-Canada border.⁵⁴ The freeze was scheduled to end on October 15, 2012, but was extended until April 15, 2013.

Canadian Border Region licensees were required to complete reconfiguration by April 14, 2011. Licensee requests for waiver of this deadline were discussed in Section I.B.3.b. of this report.

a. **Frequency Proposals**

The TA’s frequency planning activities in the Canadian border-affected area in the fourth quarter of 2012 continued to focus on issues raised by licensees, such as combiner spacing, modifying replacement frequencies to relieve blocking by other licensees delayed in clearing replacement frequencies, unique equipment limitations such as with vehicular repeater systems, and providing replacement frequencies for STAs granted after the initial frequency planning was completed. Additional information about Frequency Proposal Reports (“FPRs”) is provided in Appendix 5.

b. **Planning**

As of December 31, 2012, 67 PFAs, with a total contract value, including amendments, of \$15.5 million, were approved by the TA for licensees in or adjacent to the Canadian Border Regions. After reaching agreement on a PFA, licensees and their vendors conduct planning activities and prepare a cost estimate for their reconfiguration.

c. **Negotiations**

After a licensee submits a cost estimate to Sprint Nextel, the licensee and Sprint Nextel have 30 days for FRA negotiations. If they are unable to negotiate an FRA within the 30-day period, the parties participate in mediation for 20 days. Table 3 provides information about the status of FRA negotiations and approval for Canadian border licensees.

http://www.800TA.org/content/resources/Implementation_Plan_CBR_10.01.08.pdf, approved by Canadian Border Public Notice.

⁵⁴ See “Public Safety and Homeland Security Bureau Extends 800 MHz Application Freeze for Wave 4 Border Area NPSPAC and Non-NPSPAC Licensees Along the U.S.-Canada Border,” *Public Notice*, 27 FCC Rcd 12340 (2012).

**Table 3: Status of Reconfiguration for Canadian Border Licensees as of December 31, 2012
(milestones achieved by number of FRAs)⁵⁵**

Stage	Anticipated FRAs	FRA Negotiations and Approval			Reconfiguration Implementation

Appendices 1B and 3B provide additional information about the status of FRA negotiations for Canadian border licensees.

(i) **Stage 1**

Most Canadian border Stage 1 licensees included planning costs (if any) in their FRAs. Seven Stage 1 licensees negotiated PFAs.

The negotiation and mediation period for Canadian border region Stage 1 licensees without a PFA began on January 12, 2009. As of December 31, 2012, all of the 129 mediation dockets opened for Stage 1 licensees had been resolved. As of December 31, 2012, all of the 75 FRAs anticipated for Canadian border region Stage 1 licensees were submitted to the TA.⁵⁶ The TA has approved 75 Canadian Border Stage 1 FRAs with a contract value, including amendments, totaling \$12.6 million.

(ii) **Stage 2**

Approximately half of the Canadian border Stage 2 licensees submitted an RFPF and negotiated a PFA.

For Canadian border region Stage 2 licensees that do not require a PFA, the negotiation and mediation period began on April 15, 2009. After submitting a cost estimate, a licensee and Sprint Nextel had 30 days to negotiate an FRA under the monitoring of a TA mediator. If, at the

⁵⁵ SED agreements are counted as submitted FRAs in this chart. Sprint Nextel is the data source for the estimated number of anticipated FRAs in column 2 and the number of FRAs with physical retunes reported as completed in column 6. The figures have not been verified by the TA. Any changes to the number of anticipated FRAs from previous Quarterly Progress Reports are the result of how Sprint Nextel structures deals with licensees (*i.e.*, deals cancelled or consolidated).

⁵⁶ SED agreements are counted as submitted FRAs in this number.

end of the 30-day period, there was no agreement on an FRA, the licensee and Sprint Nextel participated in mediation for 20 days.

As of December 31, 2012, of the 156 mediation dockets opened for Stage 2 licensees, 153 mediation dockets had been resolved (an increase from 152 resolved as of September 30, 2012). The licensees in two mediations had negotiated PFAs: one had submitted a cost estimate to Sprint Nextel and one had reached agreement with Sprint Nextel regarding, but had not yet executed, an FRA. The licensee in one mediation chose not to negotiate a PFA with Sprint Nextel and had submitted a cost estimate to Sprint Nextel.

As of December 31, 2012, 115 FRAs (98 percent) were submitted to the TA out of the 117 FRAs anticipated for Canadian border region Stage 2 licensees. The TA has approved 115 FRAs with a contract value, including amendments, totaling \$125.3 million.

d. **Reconfiguration Implementation**

Canadian border licensees continue to make progress with their implementation activities.

(i) **Stage 1**

As of December 31, 2012, there were 69 Canadian border Stage 1 FRAs for which licensees had completed their physical retunes and transitioned to their new channels. As of December 31, 2012, physical retuning was complete for 92 percent of Canadian border Stage 1 FRAs. Map 4 shows the progress of Canadian border Stage 1 licensees.

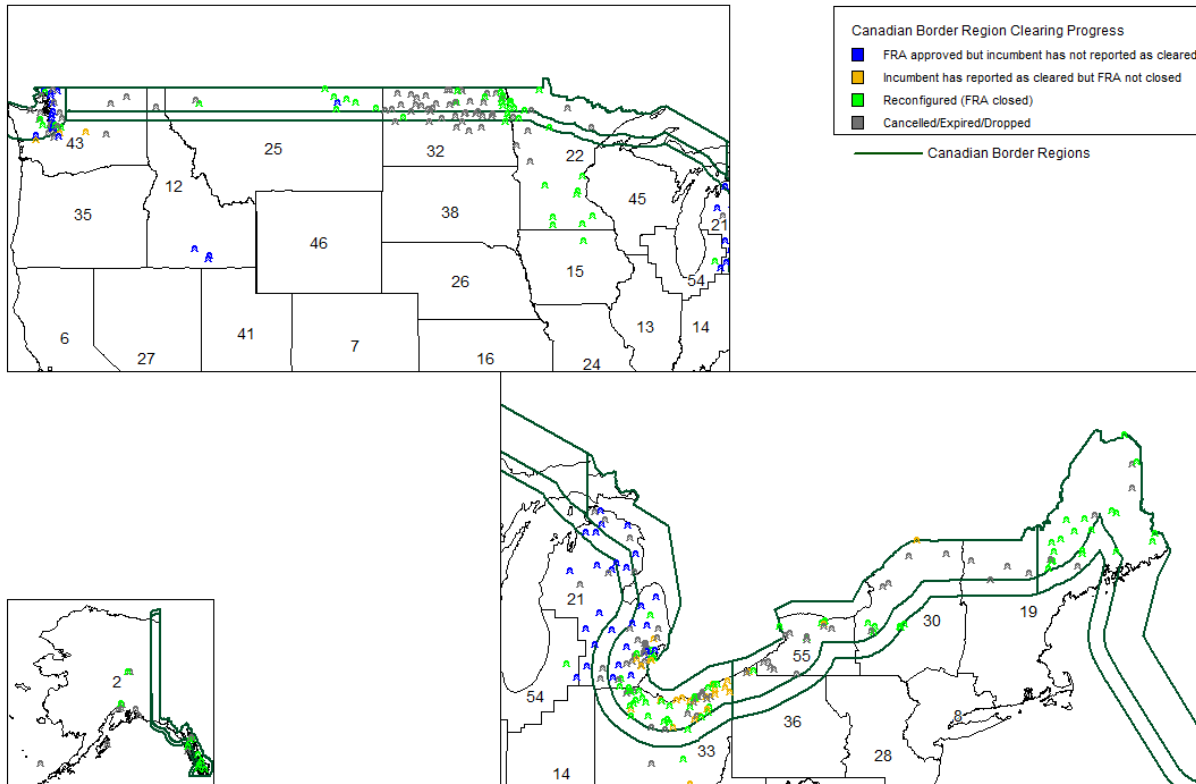

Map 4: Canadian Border Region Stage 1 Clearing Progress

800 MHz Reconfiguration Progress

(c) 2013, 800 MHz Transition Administrator, LLC
01/23/13

Canadian Border Regions, Stage 1 Site-specific Call Signs

Clearing Progress and Call Sign location as of 12/31/12 (Q4 2012)

(ii) Stage 2

Reconfiguration of Stage 2 Public Safety licensees, often with complex system designs and interoperability requirements among numerous licensees in a region, requires more time and coordination than is needed for Stage 1 reconfiguration. Furthermore, certain Stage 1 licensees need to complete their physical retuning in order to clear replacement channels for Stage 2 licensees. Implementation in the Canadian Border Regions has an added layer of complexity compared to the non-border areas because there are Public Safety licensees that have extensive numbers of reconfiguring frequencies that block the replacement channels of other Public Safety licensees, as well as channels that may, in turn, be blocked by other reconfiguring Public Safety licensees. This is a function of the Canadian Border Region band plan and requires the licensees to closely coordinate their infrastructure reconfigurations.⁵⁷

⁵⁷ The blocking licensees are clearing Channels 1-120, but may also have NPSPAC channels they are reconfiguring in the same timeframe as well. In the pre-reconfiguration Canadian border band plan, Channels 1-120 included specific pool allocations for Public Safety which were heavily used. In non-border areas, Channels 1-120 were

During the fourth quarter, the TA did not conduct any Implementation Planning Sessions in the Canadian Border Regions. As of December 31, 2012, the TA held two IPS in one NPSPAC region (NPSPAC Region 33: Ohio), attended by 25 licensees operating approximately 200,000 radios. The TA is gathering and analyzing information to assess future IPS in the Canadian Border Regions. In some regions, the TA will hold a session to develop an initial regional schedule, with the understanding that follow-up IPS may be necessary. In regions where the TA has determined that IPS may not be necessary, the TA will communicate with licensees to document the interoperability environment, dependencies, and any other relevant issues and develop a regional schedule.

The TA conducted an IPS in NPSPAC Region 43: Washington on January 31, 2013 and an IPS in NPSPAC Region 21: Michigan on March 6, 2013. Implementation in these regions is complicated due to several factors, including extensive interoperability and blocking. There are Public Safety licensees that have extensive numbers of reconfiguring frequencies which block the replacement channels of other Public Safety licensees, as well as channels that may, in turn, be blocked by other reconfiguring Public Safety licensees. This is a function of the Canadian Border Region band plan and requires the licensees to closely coordinate their infrastructure reconfigurations.⁵⁸ At the sessions, the TA provided detailed frequency and distance data for licensees about these blocking situations and discussed implementation sequencing and solutions to address them. The TA worked with licensees, vendors, and Sprint Nextel to develop a consolidated implementation schedule for the region that identifies key milestones and dependencies associated with reconfiguration implementation activities.

A key component of reconfiguration implementation is the retuning, reflashing, and/or replacement of subscriber equipment. Canadian border Stage 2 licensees retuned, reflashed, or replaced approximately 27,000 radios (first touches) in the fourth quarter, raising the total number to approximately 112,000 radios (first touches) as of December 31, 2012.

Another significant milestone in the implementation process is the retuning of base stations to the licensee's new channel assignments and commencement of system operations on the new channels. During the fourth quarter, there were six additional Canadian border Stage 2 FRAs for which the licensee reported its physical retune as complete. As of December 31, 2012, there were 54 Canadian border Stage 2 FRAs for which licensees had completed their physical retunes and transitioned to their new channels. This does not consider licensees with post-cutover subscriber unit second touches or other technical work. As of December 31, 2012, physical retuning was complete for 46 percent of Canadian border Stage 2 FRAs. Map 5 shows the progress of Canadian border Stage 2 licensees.

General Category and the number of Public Safety licensees were, in general, much fewer and represented smaller systems.

⁵⁸ The blocking licensees are reconfiguring frequencies in the Channels 1-120 range, but may also have NPSPAC channels they are reconfiguring in the same timeframe. In the pre-reconfiguration Canadian border band plan, Channels 1-120 included heavily used specific pool allocations for Public Safety. In non-border areas, Channels 1-120 were General Category and the number of Public Safety licensees were, in general, much fewer and represented smaller systems.

Clearing Progress and Call Sign location as of 12/31/12 (Q4 2012)

4. Puerto Rico

The 18-month transition period for reconfiguration of licensees in Puerto Rico began on September 20, 2010.⁵⁹ The PSHSB's *Third Report and Order* established three stages for reconfiguration in Puerto Rico. Stage 1 is the relocation of non-Public Safety licensees in Channels 1-120. In Stage 2, NPSPAC licensees relocate 15 MHz lower to the new NPSPAC band; high-site incumbent licensees relocate from the ESMR Band to the Interleaved Band; and Economic Area ("EA") and site-based ESMR licensees that are part of an EA Election relocate from the Interleaved, Expansion, and Guard Bands into the ESMR Band. There are two EA licensees that have made elections to move frequencies into the ESMR band. Stage 3 may include the relocation of the licenses of Preferred Communication Systems, Inc. and Preferred Acquisitions, Inc. ("Preferred") and, if necessary, *pro rata* apportionment of ESMR spectrum in accordance with the PSHSB's directions in the *Third Report and Order*. Pursuant to the FCC's

⁵⁹ See "Public Safety and Homeland Security Bureau Announces that the 18-Month Transition Period for 800 MHz Band Reconfiguration in Puerto Rico (Region 47) will Commence on September 20, 2010," *Public Notice*, 25 FCC Rcd 13110, 13113 (2010).

direction, Preferred's reconfiguration is deferred pending the resolution of a pending show cause proceeding and Preferred's request for waiver of its 800 MHz construction obligations.⁶⁰

The TA's Implementation Timetable for the Reconfiguration of the 800 MHz Band in Puerto Rico ("Implementation Timetable") set forth the timeframe and sequence for the reconfiguration of Puerto Rico licensees.⁶¹ It established the timelines for affected licensees to file Guard Band Elections, submit cost estimates, negotiate FRAs, and complete implementation.

Puerto Rico licensees were required to complete reconfiguration by March 19, 2012. Licensee requests for waiver of this deadline were discussed in Section I.B.3.c. of this report.

a. **Negotiations**

As of December 31, 2012, two PFAs, with a total contract value, including amendments, of \$0.2 million, were approved by the TA for Puerto Rico licensees that must be reconfigured from 816.5-821/861.5-866 MHz.

All of the NPSPAC licensees in Puerto Rico have negotiated and submitted FRAs to the TA.

The 90-day mandatory negotiation period for the remaining high-site non-Public Safety incumbent licensees in Puerto Rico that must be reconfigured from the 816.5-821/861.5-866 MHz portion of the band began on September 20, 2010. The mediation period for these Puerto Rico licensees began on December 21, 2010. As of December 31, 2012, all of the eight mediation dockets opened for Puerto Rico licensees had been resolved.

As of December 31, 2012, seven FRAs (100 percent) were submitted to the TA out of the seven FRAs anticipated for Puerto Rico licensees that must be reconfigured from 816.5-821/861.5-866 MHz. The TA has approved seven FRAs with a contract value, including amendments, totaling approximately \$1.0 million. Appendices 2 and 3C provide additional information.

b. **Reconfiguration Implementation**

As of December 31, 2012, there were three FRAs for which Puerto Rico licensees that must be reconfigured from 816.5-821/861.5-866 MHz had completed their physical retunes and transitioned to their new channels. As of December 31, 2012, physical retuning was complete for 43 percent of these FRAs.

As of December 31, 2012, there were six FRAs for which Puerto Rico NPSPAC licensees had completed their physical retunes and transitioned to their new channels. As of December 31, 2012, physical retuning was complete for 100 percent of Puerto Rico NPSPAC FRAs.

⁶⁰ See *Third Report and Order*, 25 FCC Rcd at 4447 ¶ 12.

⁶¹ See 800 MHz Transition Administrator, LLC, "Implementation Timetable for the Reconfiguration of the 800 MHz Band in Puerto Rico," WT Docket No. 02-55, at 12 (filed Aug. 20, 2010).

5. ESMR Band Licensees

There are some non-border high-site licensees located in the ESMR Band (817-821/862-866 MHz) that are required to relocate to frequencies in the non-ESMR band below 816/861 MHz. The TA placed these licensees on the same schedule for FRA negotiations and mediation as the Puerto Rico licensees. As of December 31, 2012, all of the five mediation dockets opened for ESMR Band licensees had been resolved. As of December 31, 2012, the one FRA anticipated for an ESMR Band licensee was submitted to and approved by the TA. Appendix 3C provides additional information.

6. U.S. Virgin Islands

The 12-month transition period for completion of rebanding in the U.S. Virgin Islands (“USVI”) began on March 21, 2011. The PSHSB’s *Fourth Report and Order* and February 18, 2011 Public Notice established timelines for planning, negotiation, and implementation for USVI licensees.⁶²

a. Negotiations

For USVI licensees that had not completed FRA negotiations, the PSHSB established a 90-day mandatory negotiation period to complete planning and negotiations, which began on March 21, 2011. The mediation period for USVI licensees began on June 21, 2011. As of December 31, 2012, the one mediation docket opened for the USVI had been resolved.

As of December 31, 2012, the one FRA anticipated for a USVI licensee that must be reconfigured from 816.5-821/861.5-866 MHz was submitted to and approved by the TA. Appendix 3C provides additional information.

b. Reconfiguration Implementation

Channels 1-120 have been cleared of incumbent site-specific licensees and there are no NPSPAC licensees to retune in the USVI. The PSHSB required high-site licensees relocating out of the 816.5-821/861.5-866 MHz portion of the band to complete reconfiguration by September 20, 2011 and all USVI licensees to complete reconfiguration by March 20, 2012. As of December 31, 2012, there was one FRA for which a USVI licensee that must be reconfigured from 816.5-821/861.5-866 MHz had completed its physical retune and transitioned to its new channels. As of December 31, 2012, physical retuning was complete for 100 percent of these FRAs.

7. Change Notices and Amendments

When a licensee encounters an emergency or unforeseeable need to change the scope or cost of its planning or reconfiguration implementation activities after it has signed its TA-

⁶² See *Fourth Report and Order*; see “Public Safety and Homeland Security Bureau Announces that the 12-Month Transition Period for 800 MHz Band Reconfiguration in the United States Virgin Islands (Region 48) will Commence on March 21, 2011,” *Public Notice*, 26 FCC Rcd 1948 (2011).

approved PFA or FRA, it must submit a Change Notice to Sprint Nextel and the TA. Change Notices generally seek modifications to the services and equipment provided for in the PFA or FRA and the associated costs. The TA encourages licensees to use the Change Notice Form available on the TA's website when submitting a Change Notice.⁶³ Licensees and Sprint Nextel negotiate the Change Notice and, in most cases, submit an amendment to the PFA or FRA to the TA for review and approval.

During the fourth quarter of 2012, licensees submitted 102 Change Notices. Some Change Notices are resolved quickly, but others can take time to negotiate and result in an amendment. In some cases, the TA uses the mediation process to assist licensees and Sprint Nextel in reaching agreement on Change Notices.

Most Change Notices result in an amendment to the licensee's PFA or FRA. During the fourth quarter of 2012, licensees and Sprint Nextel negotiated and submitted to the TA five PFA amendments and 32 FRA amendments.

B. Program Financial Information

This section provides information for the fourth quarter of 2012 regarding reconfiguration expenditures, the Letter of Credit, the external audit, the TA's fees and expenses, and the closing process and reconfiguration Completion Certifications.

1. Reconfiguration Expenditures

a. 800 MHz Incumbent Licensee Reconfiguration Costs

As of December 31, 2012, Sprint Nextel and incumbent licensees had executed FRAs and PFAs pursuant to TA-approved cost estimates, as adjusted to reflect TA-approved actual costs, totaling approximately \$1,096.3 million, and Sprint Nextel had paid approximately \$788.9 million of this amount as both advance payments and for work completed to date. This compares to \$1,096.2 million in executed FRAs and PFAs and \$764.7 million paid as of September 30, 2012.

Sprint Nextel has reported to the TA that, as of December 31, 2012, it had incurred, on a cash basis, approximately \$1,672.5 million in costs for: (1) payments made to incumbent licensees or their vendors in accordance with TA-approved agreements executed by incumbent licensees and Sprint Nextel; and (2) replacement equipment costs, including costs related to the development of software for certain incumbent licensee subscriber equipment that enables such subscriber equipment to be retuned rather than replaced and costs related to replacement equipment to be provided to incumbent licensees by Sprint Nextel (collectively "800 MHz Incumbent Licensee Reconfiguration Costs"). To date, Sprint Nextel had requested that the TA assess approximately \$826.2 million of the 800 MHz Incumbent Licensee Reconfiguration Costs (submitted as of December 31, 2012) for the purpose of determining whether those costs are creditable against any payment Sprint Nextel may be obligated to make to the United States

⁶³ The form is available at http://www.800TA.org/content/resources/Change_Noteice_Form.doc.

Treasury at the completion of reconfiguration (“Creditable Costs”). The status of these costs is as follows:

- \$735.9 million is determined by the TA to be Creditable Costs pending the Final Accounting to be performed at completion of reconfiguration and the results of the external audit.
- The remaining \$90.3 million requires additional information from Sprint Nextel or incumbent licensees to determine whether these costs are creditable.

Sprint Nextel has not submitted the remaining \$846.3 million of the 800 MHz Incumbent Licensee Reconfiguration Costs, which consists primarily of payments for replacement radios and other equipment, to the TA for credit assessment or for external audit.

b. **Sprint Nextel Costs**

Sprint Nextel has reported to the TA that, as of December 31, 2012, it had incurred, on a cash basis, approximately \$342.6 million in costs to support: (1) incumbent licensee negotiations; (2) systems development costs for tracking and reporting of program activity; (3) Sprint Nextel’s program and financial management activities; (4) other program costs; and (5) reconfiguration of Sprint Nextel’s systems in the 800 MHz band (collectively “Sprint Nextel Costs”). The Sprint Nextel Costs exclude certain amounts incurred related to Sprint Nextel’s internal network costs that Sprint Nextel may submit for credit at a later date (“To Be Determined Sprint Nextel Costs”). To date, Sprint Nextel has requested that the TA assess approximately \$273.3 million of the Sprint Nextel Costs (submitted as of December 31, 2012) for the purpose of determining whether those costs are Creditable Costs. The TA has performed a review of approximately \$270.0 million in costs (submitted as of December 31, 2011). The status of these costs is as follows:

- \$209.7 million was determined by the TA to be Creditable Costs pending the Final Accounting to be performed at completion of reconfiguration and the results of the external audit.
- The remaining \$60.3 million requires additional information from Sprint Nextel to determine whether these costs are creditable.

Sprint Nextel has not submitted the remaining \$69.3 million of the Sprint Nextel Costs or any of the To Be Determined Sprint Nextel Costs to the TA for credit assessment or for external audit.

c. **1.9 GHz Clearing Costs**

On October 5, 2011, Sprint Nextel filed with the FCC its Schedule of Costs Expended in Connection with Clearance of the 1.9 GHz Band for the 10 months ended October 31, 2010 and for the inception-to-date period from January 1, 2005 to October 31, 2010, in which it reported

approximately \$730.0 million in costs expended to clear the 1.9 GHz band.⁶⁴ Subsequently, Sprint Nextel has reported to the TA that, as of December 31, 2012, it had incurred approximately \$610.4 million in costs, on a cash basis, associated with reconfiguration of the 1.9 GHz band from the inception-to-date period January 1, 2005 to December 31, 2012, which is net of the approximately \$135.0 million that Sprint Nextel received as reimbursement from the Mobile Satellite Service (“MSS”) licensees for their *pro rata* portion of the costs to clear the 1.9 GHz spectrum.⁶⁵ These costs are reported for informational purposes only. The TA does not conduct an analysis of these costs.

d. **Estimated Total Reconfiguration Expenditures**

On February 28, 2013, Sprint Nextel filed with the Securities and Exchange Commission (“SEC”) its Annual Report on Form 10-K for the fiscal year ended December 31, 2012 and disclosed that its total payments directly attributable to its performance under the *Report and Order*, from the inception of the program through December 31, 2012, are approximately \$3.2 billion.⁶⁶

2. **Letter of Credit**

For the quarter ended December 31, 2012, Sprint Nextel made its required payments to licensees and vendors. Accordingly, there has been no need to draw on the Letter of Credit through December 31, 2012. Sprint Nextel has reported to the TA that, as of December 31, 2012, it had incurred, on a cash basis, approximately \$246.2 million in Letter of Credit Fees.

The TA has continued to monitor the amount of the Letter of Credit in view of Sprint Nextel’s programmatic obligations. On December 14, 2012, the TA recommended that the Letter of Credit be further reduced by \$25.1 million based on costs paid through September 30, 2012. The FCC concurred with the TA’s request on December 18, 2012, and the Letter of Credit was reduced from \$883.6 million to \$858.5 million.

3. **External Audit**

In the fourth quarter of 2012, CohnReznick, the external auditors selected by the TA, continued the annual audit of program expenditures for the year ended December 31, 2012 and for the period from inception (August 6, 2004) through December 31, 2012 (“the 2012 Audit”). As discussed previously, certain 800 MHz Incumbent Licensee Reconfiguration Costs and Sprint Nextel Costs have not been submitted by Sprint Nextel to the TA for credit assessment or for external audit. Accordingly, these costs may be included in a subsequent period audit.

⁶⁴ See Sprint Nextel Corporation, “Schedule of Costs Expended in Connection with Clearance of the 1.9 GHz Band,” at 2, attached to Letter from Trey Hanbury, Sprint Nextel Corporation, to Marlene H. Dortch, Secretary, FCC, WT Docket No. 02-55 (filed Oct. 5, 2011).

⁶⁵ See Sprint Nextel Corporation, Annual Report (Form 10-K), at F-29 (filed Feb. 27, 2012), available at <http://www.sec.gov/Archives/edgar/data/101830/000010183012000015/sprint201110-k.htm>.

⁶⁶ See Sprint Nextel Corporation, Annual Report (Form 10-K), at F-32 (filed Feb. 28, 2013), available at <http://www.sec.gov/Archives/edgar/data/101830/000010183013000006/sprint201210-k.htm>.

4. Transition Administrator

a. Fees, Expenses, and Staffing

The TA's fees and expenses for the quarter ended December 31, 2012 were approximately \$5.62 million in fees and \$0.10 million in expenses, for a total of approximately \$5.72 million, which is \$0.51 million less than the forecast for the fourth quarter. Additional details are provided in Appendix 10. TA staffing as of December 31, 2012 consisted of 43 Full Time Equivalents ("FTEs").

The TA's fees and expenses for the quarter ending March 31, 2013 are estimated at \$6.80 million in fees and \$0.17 million in expenses, for a total of \$6.97 million.

b. Disclosure of Non-Reconfiguration Fees

In accordance with the TA's Independence Management Plan, the TA reports that Deloitte Consulting LLP, a subsidiary of Deloitte LLP, received \$0.48 million from Sprint Nextel in non-TA fees and costs for the quarter ended December 31, 2012; other member firms of Deloitte LLP received \$0.06 million in non-TA fees and costs for the quarter ended December 31, 2012.⁶⁷

5. Closing Process and Reconfiguration Completion Certifications

While the completion of planning activities or physical reconfiguration activities is an important achievement, licensees and Sprint Nextel must complete all closing process activities in order to complete reconfiguration and perform all contractual requirements in the PFA or FRA. The closing process ensures that the parties have met all of their obligations to each other. For FRAs, the closing process consists of the following activities:

1. License Modification – The modification of the licensee's FCC licenses to delete old frequencies.
2. Equipment Reconciliation – The true up of loaned, replaced, and replacement equipment.
3. Actual Cost Reconciliation – The true up of cost support documentation with amounts paid or to be paid by Sprint Nextel.
4. Closing – The preparation, execution, and delivery of the closing documents, including an FRA Completion Certification.

⁶⁷ See "Independence Management Plan for 800 MHz Transition Administrator Team Members (Version 1.4)," at 4, attached to Letter from Robert B. Kelly, Squire, Sanders & Dempsey (US) LLP, to Marlene H. Dortch, Secretary, FCC, WT Docket No. 02-55 (filed Apr. 21, 2011). As used in this context, other member firms of Deloitte LLP means Deloitte & Touche LLP, Deloitte Financial Advisory Services LLP, or Deloitte Tax LLP, each a subsidiary of Deloitte LLP. Please see <http://www.deloitte.com/us/about> for a detailed description of the legal structure of Deloitte LLP and its subsidiaries.

Licensees should consult their FRA closely and ensure they have complied with all requirements to return equipment that are provided for in the FRA, such as returning replaced equipment to Sprint Nextel or Motorola. If a licensee has not complied, it may be responsible, among other things, for paying the costs of the replacement equipment it received or for returning the replacement equipment.

During the ACR process, a licensee provides Sprint Nextel with supporting documentation for the actual costs incurred for its planning or reconfiguration, and Sprint Nextel validates the costs incurred and performs a true-up of the actual costs as compared to the estimated costs in the PFA or FRA. The result is an ACR Statement documenting the actual costs incurred and payments made to the licensee, including final amounts due from or to the parties. Licensees owed additional funds by Sprint Nextel will generally not be paid those amounts until the ACR statements have been executed by both the licensee and Sprint Nextel.

Once the ACR Statement is complete, Sprint Nextel sends the licensee closing documents, including a Completion Certification. A licensee is required by its PFA or FRA to execute and return the closing documents to Sprint Nextel. It is important for licensees and Sprint Nextel to complete these activities in a timely manner. Failure to conduct closing activities in a timely manner can result in significant program delays, lost or misplaced actual cost support documentation, and other issues that could substantially impact amounts owed from or due to Sprint Nextel.

In the Actual Cost Reconciliation Fact Sheet, which is posted on the TA's website, the TA provides specific timeframes by which licensees and Sprint Nextel should complete ACR and other closing activities. To minimize the effort and times associated with the closing process, licensees should also review the following TA guidance:

- The Change Notice Process Fact Sheet;
- The Incumbent Labor Reimbursement Policy; and
- The Reconfiguration Completion Checklist.

Each of these documents is available on the TA's website at <http://www.800TA.org>. In addition, Webinars (online training seminars) regarding closing process topics, such as ACR and Reconfiguration Completion, to assist licensees in understanding the key activities in the process may be found on the TA's website at <http://www.800TA.org/content/ipswebinars>.

As outlined in Table 4 below, there continue to be delays between the time licensees complete physical reconfiguration activities and the closing of the FRA.⁶⁸ For those FRAs that have closed as of December 31, 2012, the closing process has taken an average of 12.7 months to

⁶⁸ The completion of all physical reconfiguration activities includes the completion of physical retuning and, where applicable, completion of the "second touch." The completion of physical retuning means the individual licensee has retuned its infrastructure to operate on its replacement frequencies and has cleared its old frequencies. Completion of the "second touch" means that the licensee, if provided for in the FRA, has completed a second (or subsequent) touch of its subscriber units to remove the pre-rebanding channels.

complete following the completion of physical reconfiguration activities, compared to an average of 12.6 months through September 30, 2012. For those licensees that have completed physical reconfiguration activities but have not closed the FRA as of December 31, 2012, an average of 24.3 months has elapsed since the completion of physical reconfiguration activities compared to an average of 23.0 months as of September 30, 2012.

Table 4: FRAs in the Closing Process by Pending Activity⁶⁹

Length of Time Pending Activity Open							
Pending FRA Activity to be Completed	Quantity of FRAs	Less than 3 Months	3 to 6 Months	6 to 9 Months	9 to 12 Months	12 Months or Longer	% Greater than or Equal to 12 Months
Equipment Reconciliation	63	10	8	7	4	34	24.6%
License Modification	1	0	0	0	1	0	0.0%
Actual Cost Reconciliation Process*	246	37	51	42	15	101	73.2%
Closing	38	19	13	2	1	3	2.2%
Total FRAs Pending in Closing Process	348						
Closed FRAs**	1,374						
Total FRAs for which physical reconfiguration activities are complete***	1,722						

* Includes 19 FRAs that are also pending License Modification.

** Includes 4 FRAs that are pending TA review of the TA Completion Certifications.

*** Includes 19 FRAs without infrastructure to reconfigure that have closed or are pending closing.

During the quarter ended December 31, 2012, 14 PFA Completion Certifications, which indicates that work required to plan for the reconfiguration has been completed and parties have agreed on sums paid, were submitted to the TA, increasing the total submitted over the life of the program to 442.⁷⁰ Of these, the TA reviewed and found all 442 PFA Completion Certifications sufficient, subject to post-close audit adjustments. Of the 569 PFAs that have been executed between licensees and Sprint Nextel, approximately 22.3 percent of executed PFAs remain open as of December 31, 2012. Appendix 8 contains a summary of PFAs that have closed, and Appendix 9 contains a listing of PFAs that have not closed as of the end of the fourth quarter.

The FRA Completion Certification certifies that the licensee has relinquished its original 800 MHz frequencies and reconfigured its facilities to operate on replacement frequencies; that all reconfiguration work required has been satisfactorily completed; and that the licensee and Sprint Nextel have agreed on the amount paid by Sprint Nextel for such work. A licensee's

⁶⁹ This table is created from data provided by Sprint Nextel and collected by the TA directly from licensees.

⁷⁰ Of these, 54 were for Stage 1 licensees and 388 were for Stage 2 licensees.

reconfiguration is not complete until this certification has been executed and delivered by the licensee to Sprint Nextel.

During the fourth quarter of 2012, 18 FRA Completion Certifications were submitted to the TA, increasing the total submitted over the life of the program to 1,374.⁷¹ Of these, the TA reviewed and found 1,370 FRA Completion Certifications sufficient, subject to post-close audit adjustments, with the remaining four under review as of December 31, 2012. Of the 1,976 FRAs that have been executed between licensees and Sprint Nextel, approximately 30.7 percent of executed FRAs remain open as of December 31, 2012. Appendix 8 contains a summary of FRAs that have closed. Appendix 9 contains a listing of FRAs for which physical reconfiguration activities are complete but the FRA has not closed as of the end of the fourth quarter.

The TA reviewed the amounts expended on activities for the above-referenced PFAs and FRAs, pending any results of the TA's post-close review or external audit, to determine (1) that the amounts paid by Sprint Nextel do not exceed TA-approved contract amounts, and (2) that the reconciliation ("true-up") of any additional amount due to the licensee or its vendor or any refund due Sprint Nextel, as determined by Sprint Nextel and the licensee, is properly reflected in the 800 MHz accounting records and is consistent with payments made.⁷²

As noted above, there continue to be significant delays in the closing of those FRAs that have completed physical reconfiguration activities, but have not yet closed. To assist licensees in the closing of these FRAs, the TA is undertaking a direct calling campaign with 800 MHz licensees significantly impacted by these delays. Of the 348 licensees in the closing process, the TA has contacted 44 percent of these licensees to facilitate timely closing of the FRA. Of those, the TA is actively facilitating 39 percent of those FRAs while the rest have made additional progress in the closing process. Since the TA began the calling campaign, the TA has assisted the licensees in 40 deals in reaching the closed FRA milestone. The TA will continue to monitor the closing process, and make inquiries of licensees and Sprint Nextel, to facilitate adherence to the timelines and guidance. In the event that a licensee does not respond to the TA's calling campaign, the licensee may be referred to the PSHSB for further contact.

C. Specialized Support Functions

This section outlines additional information about TA activities that support the program, such as the Contact Center, the website, outreach, and FRA review.

To facilitate successful 800 MHz band reconfiguration, licensees and other stakeholders must have rapid and consistent access to accurate reconfiguration information, processes, and procedures. As such, the TA executes an approach that is intended to engage, educate, and equip the impacted stakeholders with the knowledge necessary to plan and implement reconfiguration activities. The TA employs a multi-pronged approach, including direct calling campaigns,

⁷¹ Of these, 939 were for Stage 1 licensees and 435 were for Stage 2 licensees.

⁷² The TA's review is limited to costs expended by non-Sprint Nextel 800 MHz licensees in accordance with the terms of the agreement. The TA has not reviewed the costs associated with replacement equipment in the FRAs. As noted, *infra*, the TA is awaiting Sprint Nextel's submission of replacement radio costs.

conference and event attendance (“Stakeholder Outreach”), Webinars (online training seminars), and interaction with industry press to accomplish these goals.

1. Stakeholder Inquiries

The TA maintains a “Contact Center” to receive and process questions and requests for information regarding reconfiguration and the TA’s activities. The TA receives inquiries from a variety of stakeholders: licensees, vendors, consultants, associations, and the trade press. During the fourth quarter, the TA received a total of 4,585 inquiries to the Contact Center (1,678 in October 2012; 1,583 in November 2012; and 1,324 in December 2012).

Several parties have contacted the TA regarding possible investment opportunities in 800 MHz band spectrum following reconfiguration. The TA has no role in the allocation of frequencies following the completion of the 800 MHz band reconfiguration. The TA does not provide advice on investments, acquisitions, or usage of licenses in the 800 MHz band. Parties interested in such matters may wish to consult the FCC’s rules and regulations and visit the FCC’s website at <http://transition.fcc.gov/pshs/public-safety-spectrum/800-MHz/> and http://wireless.fcc.gov/index.htm?job=wt_investment_scams.

2. TA-Produced Materials, TA’s Website, and Outreach Activities

The TA’s website is a significant component of the Stakeholder Outreach efforts. During the fourth quarter, the TA continued to distribute informational materials to stakeholders relating to the reconfiguration process, including fact sheets, licensee forms, direct mailings, and other materials as listed below. Many of these items are posted on the TA’s website (www.800TA.org).

- Website Updates – The TA posted information from PSHSB regarding postponing the 800 MHz financial reconciliation “true-up” date.
- Cost Metrics – The TA published monthly updates to the FRA Cost Metrics, which are a set of metrics comprised of licensee reconfiguration implementation costs and rates, based on system size.

These new or modified materials, in addition to materials previously published, are intended to provide stakeholders with sufficient information to effectively plan, negotiate, and implement reconfiguration.

3. Frequency Reconfiguration Agreement Review

The TA continues to meet its service-level goals for reviewing FRAs.⁷³ Detailed information about the time required by the TA to review and approve Stages 1 and 2 FRAs submitted to the TA is available in Appendices 6 and 7.

⁷³ The TA’s service-level targets for FRA review are review of 80 percent of FRAs within 5 business days, 95 percent within 10 business days, and 100 percent within 15 business days.

III. APPENDICES

Appendix 1A

Status of Reconfiguration for Non-Border Licensees in Channels 1-120: Milestones Completed by Number of Frequency Reconfiguration Agreements, Per Wave, Per Region, as of December 31, 2012

Notes:

* Data includes call signs in the U.S.-Mexico border region. Data may change depending upon the border area band plan.

a. Data for Channels 1-120 call signs does not include call signs that were under contract with Sprint Nextel prior to the start of reconfiguration and for which contracts will not be submitted to the TA for review and approval for Sprint Nextel credit.

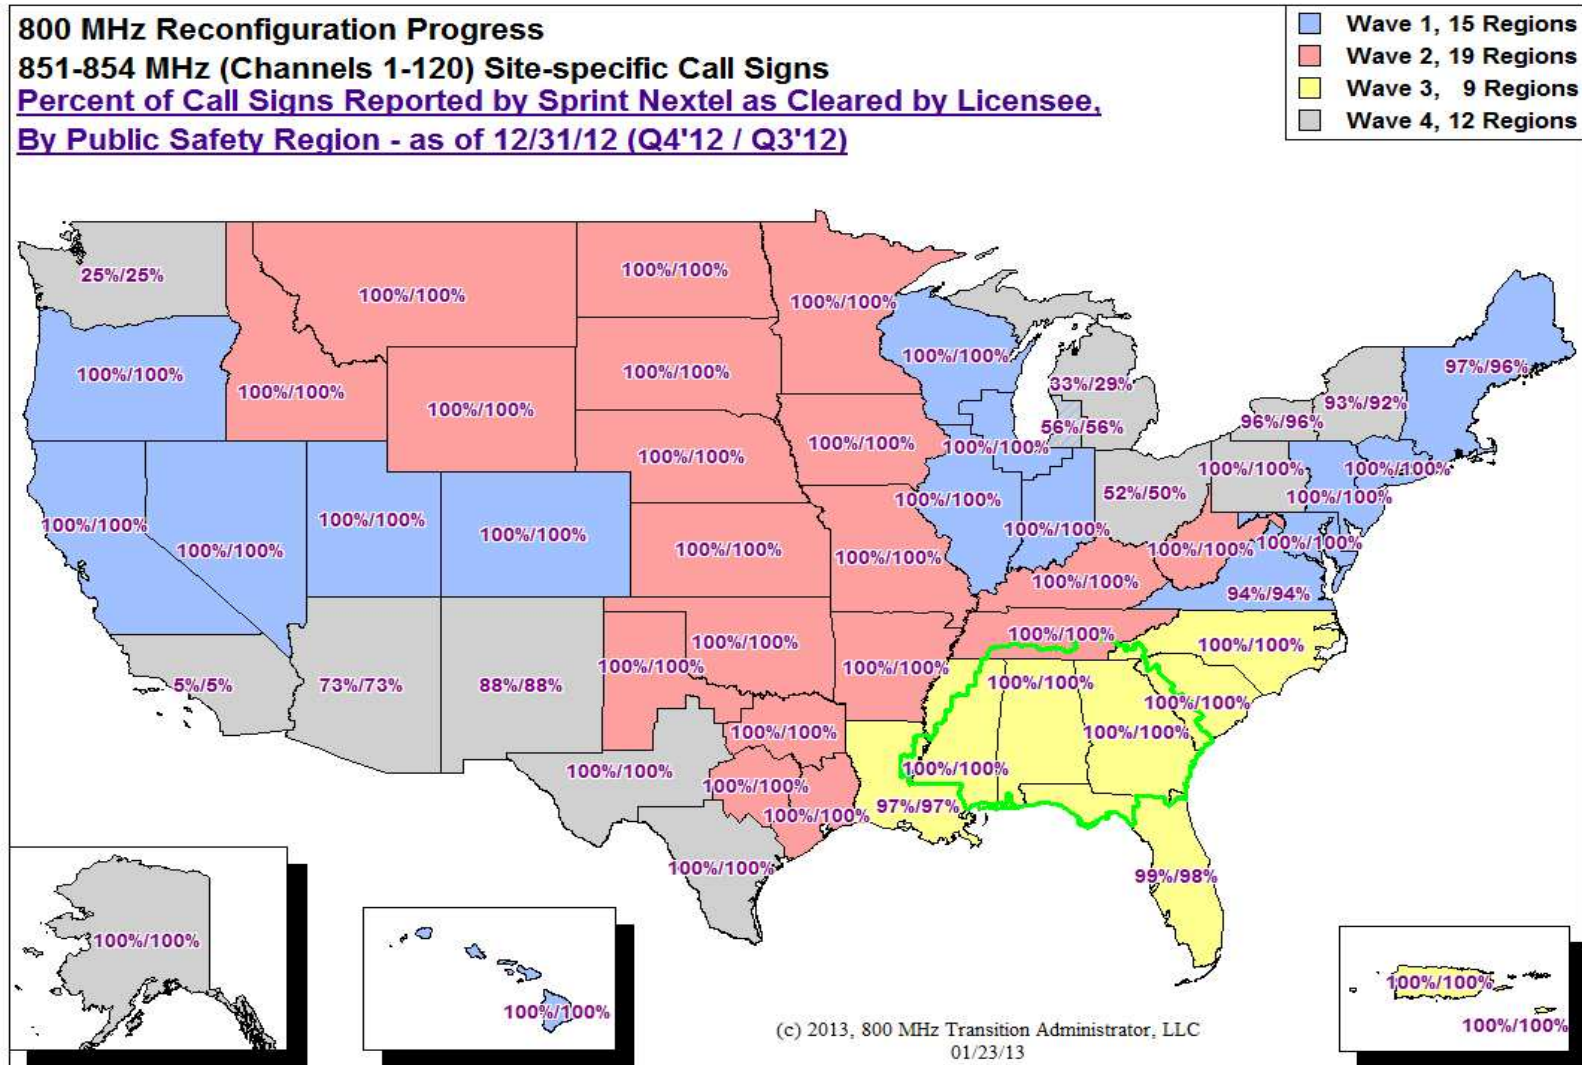

b. The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.

c. Data includes call signs with fixed locations authorized for frequencies in the 851-854 MHz range with adequate geographic data to determine a Public Safety Region.

d. Data for the call sign population and applications may not match data for Sprint Nextel milestones due to call signs expiring or being cancelled without contracts. In addition, certain FRAs may include call signs undergoing reconfiguration that may be cancelled or assigned without frequencies being changed on that particular call sign. Call signs with old frequencies being deleted via a partial assignment are not included in the delete application data.

e. Data between Incumbent Clear and Notify and Surrender Applications Submitted to FCC do not always match due to partial assignment applications filed in advance of frequency clearing to expedite the process and occasional time lags in the reporting on licensee frequency clearing.

f. Incumbent Clear and Notify counts may exceed Sprint Nextel Cleared counts in certain PSRs due to Sprint Nextel data entry delays; incumbents clearing by cancelling licenses for which Sprint Nextel would not need to clear frequencies; or the replacement channels were not currently in operation in Sprint Nextel's network.

Notes:

* Data includes call signs in the U.S.-Mexico border region. Data may change depending upon the border area band plan.

a. Data does not include call signs that were under contract with Sprint Nextel prior to the start of reconfiguration and for which contracts will not be submitted to the TA for review and approval for Sprint Nextel credit.

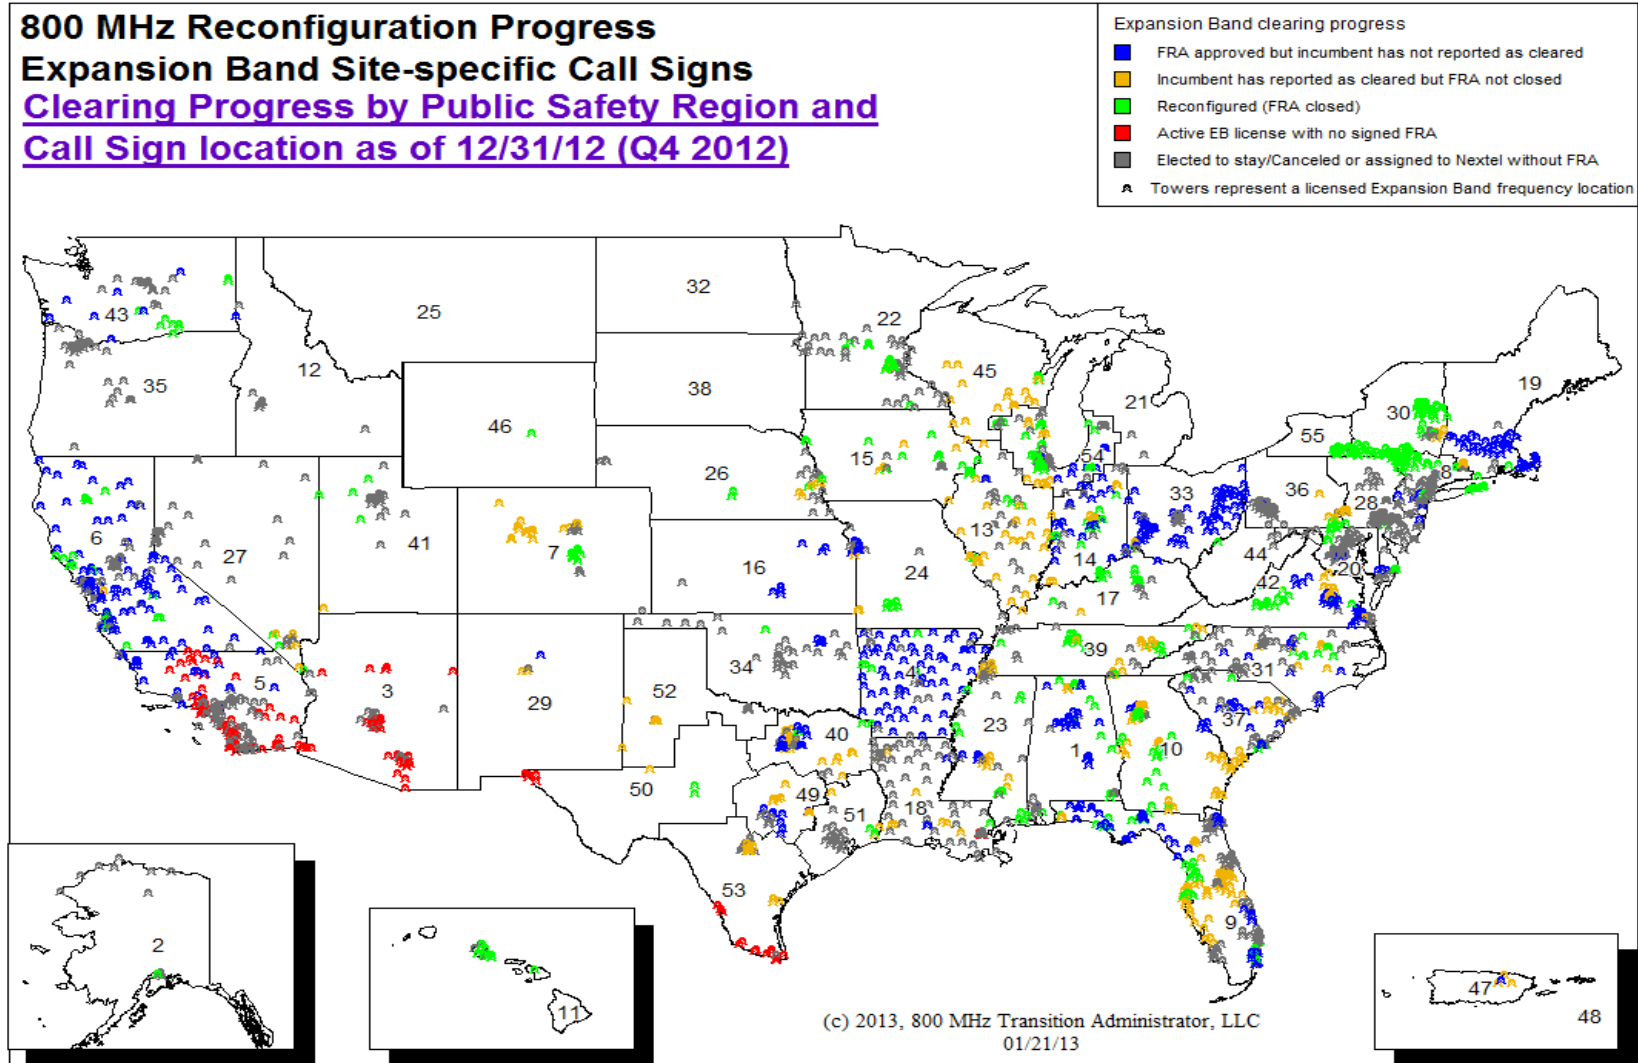

b. The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.

c. Data includes call signs with fixed locations authorized for frequencies in the Expansion Band with adequate geographic data to determine a Public Safety Region.

d. Data for the call sign population and applications may not match data for Sprint Nextel milestones due to call signs expiring or being cancelled without contracts. In addition, certain FRAs may include call signs undergoing reconfiguration that may be cancelled or assigned without frequencies being changed on that particular call sign. Call signs with old frequencies being deleted via a partial assignment are not included in the delete application data.

e. Data between Incumbent Clear and Notify and Surrender Applications Submitted to FCC do not always match due to partial assignment applications filed in advance of frequency clearing to expedite the process and occasional time lags in the reporting on licensee frequency clearing.

f. Incumbent Clear and Notify counts may exceed Sprint Nextel Cleared counts in certain PSRs due to Sprint Nextel data entry delays; incumbents clearing by cancelling licenses for which Sprint Nextel would not need to clear frequencies; or the replacement channels were not currently in operation in Sprint Nextel's network.

Notes:

* Data includes call signs in the U.S.-Mexico border region. Data may change depending upon the border area band plan.

a. Data does not include call signs that were under contract with Sprint Nextel prior to the start of reconfiguration and for which contracts will not be submitted to the TA for review and approval for Sprint Nextel credit.

b. The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.

c. Data includes call signs with fixed locations authorized for frequencies in the 866-869 MHz range, and those with adequate geographic data to determine a Public Safety Region.

d. Data for the call sign population and applications may not match data for Sprint Nextel milestones due to call signs expiring or being cancelled without contracts. In addition, certain FRAs may include call signs undergoing reconfiguration that may be cancelled or assigned without frequencies being changed on that particular call sign. Call signs with old frequencies being deleted via a partial assignment are not included in the delete application data.

e. Data between Incumbent Clear and Notify and Surrender Applications Submitted to FCC do not always match due to partial assignment applications filed in advance of frequency clearing to expedite the process and occasional time lags in the reporting on licensee frequency clearing.

f. As of the second quarter of 2007, the NPSPAC call sign data includes STA NPSPAC call signs and call signs without fixed locations (e.g., mobile-only authorizations).

g. Incumbent Clear and Notify counts may exceed Sprint Nextel Cleared counts in certain PSRs due to Sprint Nextel data entry delays; incumbents clearing by cancelling licenses for which Sprint Nextel would not need to clear frequencies; or the replacement channels were not currently in operation in Sprint Nextel's network.

Notes:

- Data for the Southeast ESMR Band call signs does not include call signs that were under contract with Sprint Nextel prior to the start of reconfiguration and for which contracts will not be submitted to the TA for review and approval for Sprint Nextel credit.
- The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.
- Data includes call signs with fixed locations authorized for frequencies in the Southeast ESMR Band with adequate geographic data to determine a Public Safety Region.
- Data for the call sign population and applications may not match data for Sprint Nextel milestones due to call signs expiring or being cancelled without contracts. In addition, certain FRAs may include call signs undergoing reconfiguration that may be cancelled or assigned without frequencies being changed on that particular call sign. Call signs with old frequencies being deleted via a partial assignment are not included in the delete application data.
- Data between Incumbent Clear and Notify and Surrender Applications Submitted to FCC do not always match due to partial assignment applications filed in advance of frequency clearing to expedite the process and occasional time lags in the reporting on licensee frequency clearing.
- Incumbent Clear and Notify counts may exceed Sprint Nextel Cleared counts in certain PSRs due to Sprint Nextel data entry delays; incumbents clearing by cancelling licenses for which Sprint Nextel would not need to clear frequencies; or the replacement channels were not currently in operation in Sprint Nextel's network.

Appendix 2
Status of Reconfiguration for Licensees in the ESMR Band:
Milestones Completed by Number of Call Signs, Per Wave, Per Region, as of December 31, 2012

Public Safety Region (PSR)	PSR Name	Updated Call Sign Population as of 12/31/12	Sprint Nextel Initiated Contact with Licensee	Sprint Nextel and Licensee Reach Pre-Contract Agreement	Sprint Nextel Submits Frequency Reconfiguration Agreement to TA	TA Approves Frequency Reconfiguration Agreement	Through 12/31/12 Call Signs with Reconfiguration Applications Submitted to FCC	Through 12/31/12 Call Signs with Reconfiguration Applications Granted	Sprint Nextel Clears Frequencies	Incumbent Clears Frequencies	Through 12/31/12 Call Signs with Surrender Applications Submitted to FCC	Through 12/31/12 Call signs with Surrender Applications Granted

Total for Waves 1-4		44	43	43	43	43	15	15	40	13	10	8

Notes:

- a. The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.
- b. Data includes call signs with fixed locations authorized for frequencies in the ESMR Band with adequate geographic data to determine a Public Safety Region.
- c. Data for the call sign population and applications may not match data for Sprint Nextel milestones due to call signs expiring or being cancelled without contracts. In addition, certain FRAs may include call signs undergoing reconfiguration that may be cancelled or assigned without frequencies being changed on that particular call sign. Call signs with old frequencies being deleted via a partial assignment are not included in the delete application data.
- d. Data between Incumbent Clear and Notify and Surrender Applications Submitted to FCC do not always match due to partial assignment applications filed in advance of frequency clearing to expedite the process and occasional time lags in the reporting on licensee frequency clearing.
- e. Incumbent Clear and Notify counts may exceed Sprint Nextel Cleared counts in certain PSRs due to Sprint Nextel data entry delays; incumbents clearing by cancelling licenses for which Sprint Nextel would not need to clear frequencies; or the replacement channels were not currently in operation in Sprint Nextel's network.

55	New York - Buffalo	6	27	33
Total for Waves 1-4		211	1211	1422

Note:

(a) For Non-Canadian Border PSR 15, a call sign has frequencies in both PSR 15 and PSR 22. The reconfiguration of the frequencies on this call sign in PSR 22 necessitated the reconfiguration of the same frequencies in PSR 15.

Notes:

- a. Data for Channels 1-120 call signs excludes call signs that were under contract with Sprint Nextel prior to the start of reconfiguration and for which contracts are not going to be submitted to the TA for review and approval for Sprint Nextel credit. Data for Expansion Band call signs excludes call signs under prior contract and call signs for which licensees have elected not to reconfigure.
- b. The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.
- c. Data for Channels 1-120 call signs includes call signs with at least one primary fixed location authorized for frequencies the 851-854 MHz range with adequate geographic data to determine a PSR. Expansion Band data includes call signs with at least one primary fixed location in the Expansion Band, as the Expansion Band may be defined inside and outside the Southeast ESMR region, with adequate geographic data to determine a PSR. NPSPAC data includes call signs with fixed locations in the 866-869 MHz range with adequate geographic data to determine a PSR. Southeast ESMR Band data includes call signs with fixed locations in the 858.5-862 MHz range within the Southeast ESMR region and with adequate geographic data to determine a PSR. Call signs with locations in multiple PSRs are counted for each PSR. Call signs are counted within every PSR for which they have a fixed primary location.
- d. Data has been adjusted to reflect the change in the band plan in the Atlanta area pursuant to the FCC's October 5, 2005 Memorandum Opinion and Order.

Appendix 6
